Technology has powerful potential to support teacher while performing three core task of teaching.

DATE:-

(3)

(1) Design:-

Design take place during lessons, in the form of in-the-moment improvisation. Teachers typically design in action due to either unforeseen opportunities or the observation that the current approach could be improved. Tools that support teacher design could guide the process of creating new activities or resources and help the teacher to assemble existing resources.

(2) Enactment:-

During this phase teacher delivers the planned lesson, utilizing performance skills and technology to engage students.

During lesson enactment technology support teacher performance by providing teachers a real time feedback to or insight into the whole class and individual student progress.

(3) Reflection:-

After the lesson, reflect on the effectiveness of the performance and identify areas for improvement.

Tools that support reflection includes apps through which teachers can collect

student feedback on lessons or video reviewing protocol and reflection on class-room events.

Effect of teacher as a performer on pupil's :-

- **Increased engagement:-**

Teacher who present lessons with enthusiasm and energy can capture students' attention more effectively.

- **Enhanced understanding:-**

When teachers illustrate ideas through performance, It can make abstract concepts more relatable and understandable.

- **Emotional Connection:-**

Performative teaching can create an emotional bond between the teacher and students.

- **Active Participation:-**

A teacher who performs can encourage students to participate actively in discussions and activities.

- **Development of critical thinking:-**

When teachers use performance to

challenge students, such as through debates or simulations, it can promote critical thinking and problem solving skills.

Advantages:-

- **Improve teacher confidence:-**

Teacher as a performer perform their actions and act as a role model for students and also boost their confidence.

- **Effective class-room management:-**

By engaging students class-room remain managed.

- **Improved retention and recall:-**

Teachers are an active participants and have a main focus on students skills and attention.

- **Better understanding:-**

Performative methods can help clarify complex concepts through storytelling or demonstration.

- **Cultural Exposure:-**

It can introduce promote analysis and

Problem- Solving through creative activities.

Disadvantages:-

- **Overemphasis on Entertainment:-**

Sometimes, the focus on being entertaining can overshadow the actual content leading to less effective learning.

- **Inconsistent Delivery:-**

Not all teachers may be comfortable or skilled at performing, which can result in varying levels of effectiveness.

- **Distraction:-**

Performative elements might distract some students from the core lesson, making it harder for them to focus on important concepts.

- **Not suitable for all subjects:-**

Some subjects may require a more traditional approach, and a performative style might not be appropriate in every context.

- **Pressure on teachers:-**

Teachers may feel pressured to constantly perform, which can lead to burnout or stress.
