

Topic: Role of teacher as a composer

• Composer:

The teacher as a composer includes the design, create and implementation of learning techniques in classroom.

• Role of teacher:

Teacher can compose the technological environment in class as technology provides teachers with an opportunity to connect with their students in a new way. It allows you to open up lines of communication and use the internet to explain curriculum material in a new way, which can be very helpful to students.

⇒ Teacher can compose the technological learning by using the following ways:

• Gamified learning:

The gamification of learning is an educational approach that seeks to motivate students by using

video game design and game elements
in learning environment.

- Digital field trips:

virtual field trips
can enhance students learning. virtual
field trips can keep students more
engaged.

- Gather student feedback:

Gathering
the student feedback by using technology
approaches. virtual survey are most common
these days. Teacher as a composer prepare
or compose the virtual survey for students.

- Creating digital contents

Digital content
help to grasp the students attention.
It help students in better understanding
about their lesson.

- Incorporate video and multimedia
into lessons and presentations:

Multimedia
content helps to vary and enhance

the learning process. Educational videos can provide more opportunities for students to engage with the content.

- **Power points and Games:**

Powerpoint allows presenters to translate complex ideas, facts or figures into easily digestible visuals. Visual representation of information activate the right hemisphere of the brain.

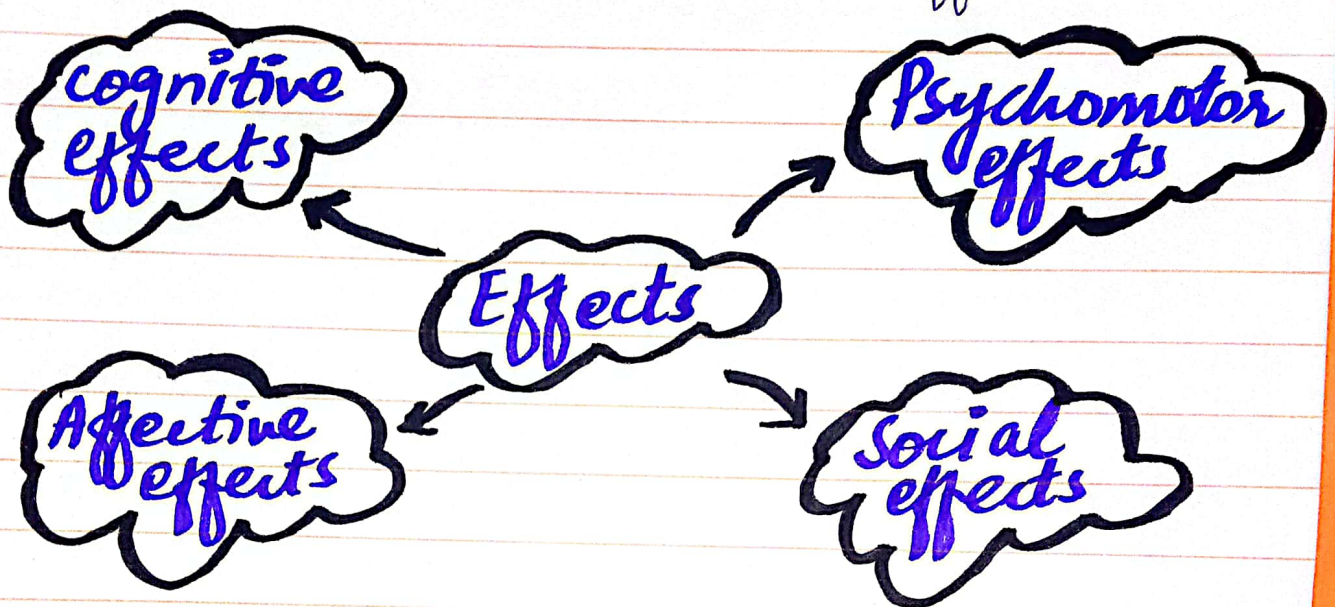

- **Internet Homework assignment:**

Online homework assignment continue to be an important aspect of the remote learning process. Online assignments also allow teachers to better understand issues their students may have.

- **Online grading system:** An online grading system provides an efficient way of managing assignments by both, professors and students. Prof can create courses, compile, execute and grade the assignments submitted by the students.

⇒ Effects:

As a composer in learning
KIT, a teacher has several effects.

● Cognitive effects:

- Enhance understanding of complex concepts.
- Increase critical thinking.
- Develop problem solving skills.

● Affective effects:

- Increased confidence in IT skills.
- Reduce anxiety and stress.
- Improve attitude toward IT.

● Psychomotor effects:

- Developed technical skills.
- Improve keyboarding and typing.
- Enhance mouse and navigation skills.

● Social effects:

- Collaborative learning opportunities.
- Develop communication skills.
- Improve online etiquette.

● Learning outcomes:

- Improve academic performance.
- Increase IIT literacy.
- Preparedness for IT-related careers.
- Lifelong learning skills.

⇒ Advantages: Here we discussed some advantages of teacher as a composer in IT.

● Customization for student needs:

Teachers can create materials that precisely match the learning needs, levels and interest of their students, which enhance engagement and effectiveness.

● Flexibility and adaptability:

Teachers can easily adapt resources and lesson plan to be current and relevant

ensuring materials stay up-to-date with educational and technological evidence.

- Encourages creativity:

Being a composer allows teacher to use their creativity making the learning process more dynamic and more enjoyable for both teachers and students.

- Deeper understanding of content:

Designing materials requires teachers to deeply understand the content which can improve their own knowledge and instructional skills.

- Student-center learning:

Teachers who create resources can design them to be more interactive and student centered, promoting active learning and critical thinking.

⇒ Disadvantages:

Here we discussed some disadvantages of teacher as a composer.

- Time constraints: Teachers often have limited time to focus on composing and creating new content due to their primary responsibilities of teaching, grading and manage classroom activities.

- Resource limitations:

Educational institutions may have inadequate resources such as software, hardware which can hinder a teacher's ability to create high quality composition.

- Rapid technological changes:

The fast pace of technological advancement can make it challenging for teachers to keep their composition up-to-date, risking obsolescence of the material.

- Need for technical skills:

Teacher may need additional IT skills to create high quality resources, which may require professional development or training.

- Time consuming:

Composing materials from scratch requires significant time and effort, which can add to teachers' already heavy workload.

- Quality and consistency?

Not all teachers have the same expertise in resource creation, which can lead to inconsistencies in quality and effectiveness.
