

Topic:

Teacher as a Critic

Critic:

“Critic is a person who evaluate and supervises or provide opinions or judgments about various form art, performances or other creative works.”

Critic Teacher:-

“A secondary or elementary school teacher who supervises or evaluate the practice teaching of a student teacher.”

Role of a critic Teacher:-

This study has for its purpose the improvement of the relationship in the day to day contact of the critic teacher and the student teacher. It is believed that much improvement can be derived for the pre-teaching experiences of teachers, if reaction and opinion of students are sought.

Role

Computer training

Guidance about technological tools

Knowledge about Cyber-Ethics

Advocate them about benefits

Encourage Learning

Promote Critical Thinking

Guiding improvement:

Computer training:-

Critic teacher suggested that pre-service teacher education should focus on building computer confidence and expanding students knowledge about computers equally.

Guidance about technological tools:-

The difficulties experienced by pre-service

teacher education when there is no guidance of tools. So a critic teacher guide them about technological tools ~~ing~~ like educational apps, games and online resources.

⇒ Encouraging Learning:-

The critic teacher motivates students to continue improving their digital skills and engage with new technology tools, guiding them through challenges and encouraging innovation.

⇒ Knowledge about cyber ethics:-

A critic teacher advocates a strong pedagogical focus to technology integration they also argue that an "awareness and understanding of cyber ethics in any education technology course is important."

⇒ Guiding improvement:-

Critic teachers not only point out the mistakes but also help student teachers figure out how to improve their work using technology. It include how to use tools more effectively.

⇒ Permute critical thinking

By acting as a critic, teachers encourage students teacher to think critically about their work. This can involve discussions about different perspective the validity of technology to improve analytical or critical thinking.

★ Responsibilities of critic teacher

- Evaluate instructional technology (software, hardware, online resources)
- Analyze educational apps, games and multimedia resources.
- Assess online courses, tutorials and educational platforms.
- Review instructional design and delivery.
- Provide feedback on technology integration.
- Recommend alternative technologies and modifications.

★ Advantages:-

● Improve teaching practice:-

Teachers who critically assess instructional technology can identify

what works well and what doesn't leading to improved teaching strategies and better learning outcomes by using technology.

- **Enhance student engagement:**

By evaluating various technologies teachers can select tools that increase student teachers engagement and motivation making learning more attractive and enjoyable.

- **Personalized learning:**

Critically analyzing instructional technology allows teachers to choose resources that order to diverse learning styles and needs facilitating personalized learning experiences.

- **Informed decision making:**

A critical approach enables teachers to make informed decisions about which technologies to implement ensuring that they align with educational goals and standards.

Disadvantages:

Decrease student confidence:

If a teacher focuses too much on the mistakes can lower student confidence, when using technology making them less likely to engage with technology in future.

Limits creativity and exploration:

Harsh criticism can make students afraid to try new ideas or tools which stifles their creativity and willingness to explore new technologies.

Increase anxiety about technology:

Some students may already feel anxious about using technology. Overly critical feedback can make them even more nervous and hesitant to engage with digital tools.

Reduce independence and self learning.

If students constantly rely on teacher feedback to improve their work, this dependency can reduce students ability to learn technology independently and develop problem solving skills.

Factors that influence teachers role as critic in IT.

It can be influenced by following factors.

Peer collaborations

Collaboration with colleagues can enhance a teacher's ability to critically assess technology. Sharing experiences and insights can lead to more informed evaluation and improve practices.

Curriculum alignment:

Teachers often evaluate technology based on how well it aligns with curriculum goals. If technology does not support learning objectives, teachers may be critical of its use.

Access to Resources

The availability of technology and resources in schools can affect how teachers evaluate and implement instructional technology. Limited access can restrict their ability to explore and critique various tools.
