

BS Regular(CHEM-404) (Past Papers)
PHOTOCHEMISTRY (CHEM -447)

Short Questions:

- Q1: Define Quantum yield?(2019)
Q2:What is photochemical reaction ? (2019)
Q3:Difference between fluorescence and phosphorescence ?(2023)
Q4:Write photosensitized reaction and mechanism using suitable examples?(2023)

Long Questions:

- Q1:Write the phenomenon of phosphorescence .What is the Quantum yield and discuss its significance in photochemistry ?(2019)
Q2:Write a note on Lasers and principle of lasers production and application ?(2023)

M.Sc.-II(Past Papers)

- Q1:Write a note on photosensitized reaction ?(2017)
Q2:Write a note on chemiluminescence?(2017)(2020)
Q3:Write a note on lasers ?(2016)
Q4: a: Describe the law of photochemistry and illustrate their advantages and limitation ?(2015)(2019)(2020)
B:explain different types of laser and their uses ?
Q5:Write a note on photosensitized reactions ?(2019)(2015)(2020)
Q6 a:Write a detailed note on quantum efficiency ?(2016)
b:Differentiate between chemiluminescence and photosensitized reaction?
Q7:differentiate between fluorescence and phosphorescence?(2018)
Q8:what is laser?write down its principle and discuss production of laser by pumping spontaneous and stimulated emission ?(2019)(2020)
Q9:discuss non radioactive relaxation process with the help of Jablonski diagram?(2019)
Q10:derive expression for fluorescence life time in the absence of quencher?(2019)
Q11: differentiate between fluorescence and phosphorescence

phenomena related to emission of light ?(2020)

- Q1:Write a note on photosensitized reaction ?(2017)
Q2:Write a note on chemiluminescence?(2017)(2020)
Q3:Write a note on lasers ?(2016)
Q4: a: Describe the law of photochemistry and illustrate their advantages and limitation ?(2015)(2019)(2020)
B:explain different types of laser and their uses ?
Q5:Write a note on photosensitized reactions ?(2019)(2015)(2020)
Q6 a:Write a detailed note on quantum efficiency ?(2016)
b:Differentiate between chemiluminescence and photosensitized reaction?
Q7:differentiate between fluorescence and phosphorescence?(2018)
Q8:what is laser?write down its principle and discuss production of laser by pumping spontaneous and stimulated emission ?(2019)(2020)
Q9:discuss non radioactive relaxation process with the help of Jablonski diagram?(2019)
Q10:derive expression for fluorescence life time in the absence of quencher?(2019)
Q11: differentiate between fluorescence and phosphorescence phenomena related to emission of light ?(2020)

PHOTOCHEMISTRY

CHEM -447 =CHEM-404 BS Regular

SHORT QUESTION S

Q1: Define Quantum yield?(2019)

Q2:What is photochemical reaction ? (2019)

Q3:Difference between fluorescence and phosphorescence ?(2023)

**Q4:Write photosensitized reaction and mechanism using suitable examples?
(2023)**

Long QUESTIONS

Q1:Write the phenomenon of phosphorescence .What is the Quantum yield and discuss its significance in photochemistry ?(2019)

Q2:Write a note on Lasers and principle of lasers production and application ?(2023)
