

Subject.

Research Methods in Edu.

Topic.

Types of Research by Purpose.

Group: 6

Roll no 137 to 145.

“ Research is creative & systematic work undertaken to increase the stock of knowledge. 🔍 ”

💡 It involves the collection, organization & analysis of evidence to increase understanding of a topic, characterized by a particular activeness to controlling sources of bias & error.

... **Types of Research** ...
by Purpose.

1. Basic Research.
2. Applied Research.
3. Evaluation Research.
4. Research & Development.
5. Action Research.

Basic Research

→ It is designed to add an organized body of scientific knowledge & does not necessarily produce results of immediate practical value.

→ It is used for advancement of the knowledge.

→ The main aim of basic research is the discovery of knowledge for the sake of knowledge.

→ It may result in discovery of new theory or development of an existing theory.
for example; Learning Theories.

Applied Research

- ▶ It is undertaken to solve an immediate practical problem & the goal of adding to scientific knowledge is secondary.
- ▶ It is a process for studying practical problems & finding a solution to it.
- ▶ The focus is to improve & modify the current practice.
- ▶ It is used for the purpose of applying or is based on basic research.
- ▶ It is used for testing the theory & evaluating its usefulness in solving problems.

Evaluation Research

❑ Evaluation Research done for the purpose of evaluating the success of a program or a curriculum is known as evaluation research.

for example;

Is CBSE syllabus better than I.C.S.E syllabus?

Research & Development

➔ Research & Development used for the development of effective products.

Products produced by R & D efforts include;

Teacher training Materials.

Learning Materials.

Sets of behavioral objectives.

Media Materials.

Management system.

Action Research

- ◆ It is focused on the immediate & specific application & not on the development of theory or general application.
- ◆ Its findings have local applicability to a particular problem & universal validity.
- ◆ These research specialists are subsidized by universities, private & government agencies & professional association.
