

• Hardware:

Q. write a note on hardware?
Q. what do you know about hardware?

“The Physical Parts of computer
(mechanical devices in the computer)
(the parts that you can touch)
The instructions or programs used
with a computer are called Hardware.”

• Internal Hardware:

Located inside the mainbox (system unit) of the computer.

• External Hardware:

Located outside the system unit.
Connect to the computer a wired
or wireless connection.

→ This hardware associated all five computer operations.

Input	Output	Storage
• Keyboard	• Monitor	• Hard drive
• Mouse	• Printer	• CD/DVD-Blu-ray
• Microphone	• Speaker	• CD/DVD-Blu-ray
• Scanner	• Headphones	• Flash memory card
• Digital camera	• Data projector	• Flash memory card reader
• Digital pen	Processing • CPU • GPU	• USB flash drive
• Touch Screen		Communication • Modem • Network adapter • Router
• Gaming controller		
• Fingerprint Reader		

• Communication devices:-

- Allow users to communicate with others and to electronically access remote information.
- Modems, network adapters, etc.
 - ↳ used to connect a computer to computer Network.

Q. what do you know about software?

→ This hardware associated all five computer operations.

Input

- keyboard
- Mouse
- Microphone
- Scanner
- Digital camera
- Digital pen
- Touch Screen
- Gaming controller
- Fingerprint Reader

Output

- Monitor
- Printer
- Speaker
- Headphones
- Data projector

Processing

- CPU
- GPU

Storage

- Hard drive
- CD/DVD-Blu-ray disc
- CD/DVD-Blu-ray drive
- Flash memory card
- Flash m card reader

- USB flash drive

Communications

- Modem
- Router
- Network adapter

• Output

- Present
- Monitor

• Storage

- Used from
- Hold
- Har

USE

- M

- C

• Input devices:

- Used to input data into the computer.
- Keyboards, mice, scanners, cameras, microphones, joysticks, touchpads, touchscreens, fingerprint readers, etc.

• Processing devices:

- Brains of computer.
- Manipulate ^{controlling} the data.
- Perform calculations and control computer's operation.
- Central Processing Unit (CPU) and memory
- Secondary processors: RAM, chipset, motherboard $\downarrow$ (made of silicon and copper)

• Output devices:

- Present results to the user.
- Monitors, Printers, speakers, projectors etc.

• Storage devices:

- Used to store data on or access data from storage media.
- Holds data and programs permanently
- Hard drives, CD/DVD discs and drives, USB flash drives, etc.
- Magnetic Storage (use a magnet to access Floppy, hard drive, video cassette)
- Optical storage (use a laser to access CD and DVD drives)
700 GB 4.7-17 GB
