

Pakistan or poor countries.

2: DISCUSS THE VARIOUS SOCIAL (معاشرتی) CULTURAL (ثقافتی) POLITICAL (سیاسی) AND ADMINISTRATIVE OBSTACLES (رکاوٹیں) IN THE WAY OF ECONOMIC DEVELOPMENT IN THE POOR COUNTRIES LIKE PAKISTAN:

is: SOCIOLOGICAL OBSTACLES: (معاشرتی رکاوٹیں)

Following are the important social obstacles in the way of economic development.

JOINT FAMILY SYSTEM: (مشترکہ خاندانی نظام)

In many countries like Pakistan this system is still available. All the members of the family live together. Few of them work hard while the others

do nothing, except quarreling (لڑنا جھگڑنا) with one another. So due to this reason national product reduces.

2. **LITERACY:** (خواندگی)

The literacy rate is very low in the under developed countries. It reduces the rate of economic growth. In Pakistan the literacy rate of education is very low. Due to this our farmer (کسان) is unable to adopt the modern methods (جدید طریقے) of production. Due to this our labour per capita out put (فی کس پیداوار) is low.

3. **CASTE SYSTEM:** (ذات پات کا نظام)

In the under developed countries people are proud about their caste and colour. Every body considers himself superior (اعلیٰ) than others due to his racial (نسلی) quality (خصوصیات). Caste system has created hatred (نفرت) among the people. This system is a hurdle (رکاوٹ) in the occupational (پیشہ وارانہ) mobility. It is an obstacle in the way of economic development.

CULTURAL OBSTACLES (ثقافتی رکاوٹیں)

1. **CUSTOMS AND TRADITIONS:** (رسم و رواج)

These are the main obstacles in the way of economic development. In the less developed

countries people borrow the money and spend it on the death, birth occasions (موت اور پیدائش کے موقع)

lavishly (فضول خرچی سے). So their rate of saving always remains negative.

2. WASTAGE OF MONEY IN SUITS: (مقدور باڑی)

The people waste a lot of money and time to engage (منگ کرنا) themselves in law suits. It reduces the savings and production of the people.

3. NO ACTIVE PARTICIPATION OF WOMAN:

(عورت کی شمولیت متحرک نہیں)

In these countries woman is unable to play her role in the economic activity (معاشی جدوجہد). Half the population remains jobless which reduces the per capita income.

4. Religious BELIEFS: (مذہب و عقائد)

The people of Pakistan prefer (ترجیح دینا) the spiritual wealth (روحانی دولت) instead of material goods (مادی اشیاء). So we can not utilize our limited (محدود) resources maximum.

5. ATTITUDE (رویہ) OF THE PEOPLE:

In the under developed countries, attitude of the people is also not positive toward economic development. People in these countries are conservative (پرانے خیالات کے) and they are not ready to accept any change. They are contented (قناعت پسند) and not ready to think towards

In the under developed countries there is development.

a centralization (تیمار) of power which causes

POLITICAL OBSTACLES (سیاسی رکاوٹیں)

1- POLITICAL INSTABILITY: (سیاسی عدم استحکام)

Political instability reduces (کم کرتا) the rate of economic growth (معاشی پیداوار) in the country.

Rapid changes (تیز تبدیلیاں) in government

discourage (خوصلہ شکنی) the rate of investment in the

country. In Pakistan there are a rapid changes in the governments. Each government condemned

(سابقہ) the policies of the previous (براجلا کہنا)

government. It discouraged the planning production and investment in the country.

2-

CENTRALIZATION OF POWER:

(اختیارات کا مرکز ہونا)

In the under developed countries there is a centralization (مرکزیت) of power which causes (مضروبہ بندی) delay (دیر) in Planning (باعت بننا), decisions (فیصلے) and execution (عمل درآمد). So the process of development (ترقی کا عمل) remains very slow.

3-

CORRUPTION: (بد عنوانی)

In the under developed countries due to corruption rate of economic, development is very low. There is a need of sympathetic (ہمدرد). Competent (اہل) and honest administration. Any how economic development is a complete process (عمل) which is directly influenced (متاثر ہونا) by economic, social, cultural, political and administrative factors

Q.3: WHAT ARE THE CAUSES (وجوہات) OF UNEQUAL DISTRIBUTION (غیر مساویانہ تقسیم) OF INCOME IN THE LESS DEVELOPED (کم ترقی یافتہ) COUNTRIES LIKE PAKISTAN? SUGGEST REMEDIES (علاج). PU (1969, 78, 86), (1995), BZU (1994), AK (1995) KU (1994) PR (1995)

Ans:

unequal distribution of wealth (دولت) is the main problem in the less developed countries. In
