

AGRICULTURE

Q:1

DISCUSS THE IMPORTANCE OF AGRICULTURE FOR PAKISTAN.
P.U.(1965,67,75,79,81,84),Isl.BWP.(1983,85)
BZU.(1984,86,88)(1995)

Q - "AGRICULTURAL DEVELOPMENT IS NECESSARY FOR THE INDUSTRIAL DEVELOPMENT OF PAKISTAN" DISCUSS.
PR(1994) 1996 -

Ans: IMPORTANCE OF AGRICULTURE IN ECONOMIC DEVELOPMENT

:- (معاشی ترقی میں زراعت کی اہمیت)

The role of agriculture in our economy is great indeed (بے شک). The economy of Pakistan is still agrarian (زرعی). Agriculture sector (زرعی شعبہ) provides (مہیا کرنا) the base (بنیاد) for the industrial sector. It is the main source (بڑا ذریعہ) of national income. The role which agriculture sector plays in the economic development can be discussed as under:-

1- BASE FOR ECONOMIC DEVELOPMENT:

(معاشی ترقی کی بنیاد)

The people of poor countries believe (صنعتوں کا قیام) that the industrialisation (یقین رکھنا) is necessary for the economic development

(معاشی ترقی). Industrial isation without an improvement in agriculture sector is not possible. Many industries like Cotton textile (کپڑے کی صنعت) and Sugar are directly dependent (انحصار کرتا) on agriculture sector. So it provides base for economic development.

2- SOURCE OF FOOD:- (ذریعہ خوراک)

Pakistan is facing the food shortage problem (غذائی قلت کا مسئلہ) and it can be solved only by improving (بہتر بنانا) the agriculture sector. Agriculture sector provides food like rice, wheat and fruits to the growing population.

3- SOURCE OF EMPLOYMENT:- (ذریعہ روزگار)

Agriculture employs (روزگار دیتا) 55% of the labour force in Pakistan. In Pakistan about 70% population (دیسی آبادی) is living in rural areas (دیسی علاقے) and 80% of the rural population is engaged (مُشک) with this sector.

4- IMPORTANT SOURCE OF NATIONAL INCOME:

Agriculture is an important source of national income in Pakistan. In 1949 its contribution (حصہ) in our national income was 60%. Now its share has decreased to 23.87% of the GDP (ہاں قومی پیداوار).

5- SOURCE OF RAW- MATERIAL: (حام مال)

In Pakistan agriculture sector provides raw material to the industries. Most of the industrial units in our country get the raw material like cotton, sugar - cane (گنا) from the Agriculture sector.

6- FOREIGN EXCHANGE SOURCE: (زرمبادلہ کا ذریعہ)

Exports (برآمدات) of Pakistan mainly consists upon (مشتمل ہوتا) raw - material. About 36% of the total foreign exchange (زرمبادلہ) is received from agriculture. Cotton and rice are the main export items.

7- SOURCE OF ECONOMIC PROSPERITY:

(معاشی خوشحالی)

Economic prosperity can be achieved (حاصل کرنا) through agriculture. So the improvement (بہتری) in agriculture is essential (ضروری) to increase the income of the people. The standard of living (معیار زندگی) is related (منسلک) to the agricultural productivity (پیداوار).

8- SOURCE OF MAN - POWER: (افراد قوت)

Agriculturist families (خاندان) provide young men for the armed forces (افواج) of our country.

Surplus (فالتو) rural (دیہی) manpower is shifting (منتقل ہوتا) to the industries and other countries to

earn (کمانا) the foreign exchange (زرمبادلہ). Due to the absorption of surplus workers in industries their income increases.

9- **SOURCE OF REVENUE:** (مالیہ)

Agriculture is also the source of revenue for the state. Government imposes taxes on land and agricultural products to increase the revenue. So it is also the main source of revenue.

10- **SOURCE OF CAPITAL FUNDS:** (سرمائے کا ذریعہ)

An improvement in agriculture leads (باعث بنتا) to an increase in the income of the farmers it increases the savings and investment in the country in various sectors (مختلف شعبے).

11- **EXTENSION OF MARKET:** (منڈی کی وسعت)

The development (ترقی) of Agriculture sector extends (وسیع کرنا) the agricultural and non-agricultural (غیر زرعی) market. The increase in the farmer's (کسان) income will increase the demand of various (مختلف) industrial products (صنعتی پیداوار) which encourages the further (مزید) production.

Keeping in view (مد نظر رکھنا) the above facts (حائق), we can not ignore (نظر انداز کرنا) the agricultured (زراعت) and the agriculturist (کاشتکار) in any development programme (ترقی کا پروگرام). No doubt agriculture sector is the back - bone

(ریڑھ کی ہڈی) of our economy.

Q:2

WHAT ARE THE CAUSES OF LOW AGRICULTURAL PRODUCTIVITY

(کم زرعی پیداوار) IN PAKISTAN? PU(1995)

Q: WHAT ARE THE CAUSES OF LOW PER ACRE

YIELD (فی ایکڑ) IN PAKISTAN? BZU(1994)

Q: WHAT ARE THE MAIN PROBLEMS OF AGRICULTURAL SECTOR? SUGGEST

REMEDIES (علاج) AKU(1993)

Q: DISCUSS THOSE FACTORS (عوامل) WHICH

AFFECT (متاثر کرنا) THE AGRICULTURE

SECTOR ADVERSELY (بری طرح) SUGGEST

REMEDIES (علاج) PU(1965,67,69,72,74,76

80,82), BZU.(1984,86), ISI.BWP.(1985,87).

Q: WHAT ARE THE CAUSES OF FOOD

SHORTAGES (قلت) SUGGEST MEASURES

(اقدامات)

Q: WHICH MEASURES GOVERNMENT OF

PAKISTAN HAS ADOPTED TO IMPROVE THIS

SECTOR? BWP(1935)

PROBLEMS OF AGRICULTURE SECTOR

OR

CAUSES OF LOW PER ACRE YIELD

(کم فی ایکڑ پیداوار)

(بنیادی تحفظ) an agricultural (زرعی). contributes (خام قومی پیداوار) 23.87% of the GDP (حصہ ملانا). About 55% Labour Force is engaged (مسلک) with this sector but there are many obstacles (رکاوٹیں) in way of its development.

Following are the main problems of agriculture sector:-

1- **LACK OF CAPITAL:** (سراے کی قلت)

Our farmer is poor and he can not use the latest machines (مشین) and better seeds (اچھے بیج). He always remains under debt (مقروض). So due to lack of capital, production remains low.

2- **LACK OF CREDIT FACILITIES:**

(قرضے کی سہولیات کی کمی)

Credit is important for the small and big farmers to improve the production. But in Pakistan credit Facilities are insufficient (ناکافی) to meet the requirements (ضروریات). Second problem is that credit is misused (غلط استعمال) by the farmers.

3- **LEASING SYSTEM:** (نظام پرہ داری)

Our leasing system also discourages (حوصلہ شکنی) the farmer. The landlord (زمیندار) and the tenant (مزارع), both can not take interest in the improvement (ترقی) of land. So it affects (بری طرح) the production badly (متاثر کرنا).

4- WATERLOGGING AND SALINITY: (سیم و تھور)

It is the main problem of the agriculture, in Pakistan a large area is affected (متاثر ہوتا) by it which has reduced our production, particularly (خصوصاً) in the province of Sind (سندھ).

5- SMUGGLING: (سرنگٹ)

It is estimated (اندازہ کرنا) that 25% food grains of Pakistan is smuggled to India and Afghanistan, so it creates shortage of food in Pakistan.

6- OLD METHODS OF CULTIVATION:

(کاشتکاری کے پرانے طریقے)

Our farmer is uneducated (جاہل) and he use the old methods of cultivation (کاشتکاری) which causes (وجوہات) the low production. He is unable to use the modern technology (جدید ٹیکنالوجی), due to non - availability of credit and skill.

7- NATURAL CIRCUMSTANCES: (قدرتی حالات)

In Pakistan, our agricultural product also remains low due to the unfavourable circumstances (حالات). For example, In 1973 & 1980, floods destroyed (تباہ کرنا) our crops (فصلیں).

8- INADEQUATE (ناکافی) SUPPLY OF WATER:

In Pakistan irrigation (آبیائی) facilities are limited (محدود) and due to this we can not cultivate

our barren lands (بہتر زمینیں) . It causes low production.

9- **INCREASE IN POPULATION:** (آبادی میں اضافہ)

In Pakistan rate of population growth is faster (تیز) than the food production. It creates the food shortage problem, and also the problem of unemployment.

10- **SMALL HOLDINGS:** (چھوٹے یونٹ)

In Pakistan land is divided into small units due to law of inheritance (قانون وراثت). So it can not be cultivated (کاشت کرنا) properly (مناسب طریقے) and per acre yield (فی ایکڑ پیداوار) remains low.

11- **SINGLE CROPPING:** (ایک فصل لگانا)

There is a low level of cropping intensity (کم سطح) in the farm (کھیت) sector. The area under double crop (علاقہ) is limited, and production remains low.

12- **UNDER - UTILIZATION** (کم استعمال) **OF LAND:**

In Pakistan there is only 25% cultivable (قابل کاشت) land out of 80 million hectares and there is a huge waste (بھاری نقصان) of natural resources (قدرتی ذرائع). Due to this our production is low.

MEASURES (اقدامات) **TO IMPROVE THE AGRICULTURE SECTOR.**

OR

MEASURE TO REMOVE THE FOOD SHORTAGE PROBLEM.

1- EXTENSION (افشار) IN CULTIVATION

AREA: (کاشت)

The agricultural product can be increased by increasing the cultivable area (قابل کاشت علاقہ). It can be increased by using the barren lands and (سیم) reducing the waterlogging (نجر زمین).

2- INTENSIVE CULTIVATION: (کاشت عمیق)

It means to cultivate the same areas which is already under cultivation (زیر کاشت) by using better seeds (اچھے بیج) and modern techniques (طریقے) of production. It increases the production.

3- SUPPLY OF INPUTS:

The productivity (پیداوار) can be increased by using the modern inputs like improved seed and fertilizers (محسوس کرنا). The government should provide the adequate supply of these inputs to the farmers at the lower rates.

4- USE OF MACHINERY: (مشینری کا استعمال)

There is a need of modern technology for the improvement of agricultural product. The government of Pakistan has also realised the importance of machinery. So Agricultural Development Bank (AKBP) and Agricultural development Corporation is providing the

machinery on low rates.

5- ESTABLISHMENT (قیام) OF CREDIT INSTITUTIONS: (ادارے)

The Government should establish the various (مختلف) financial institutions which may provide the credit to the small farmers on low rate of interest. In Pakistan the government has established the specialized (مخصوص) credit institutions to provide the loan to the farmers.

6- CONTROL ON WATERLOGGING: (سیم)

The productivity of agriculture sector can raise by (دوبارہ کابل کاشت بنانا) reclaiming the areas affected (متاثر ہونا) by waterlogging (سیم). Teub-wells should be installed in thoes areas.

7- INCENTIVE (حوصلہ افزا) TO THE FARMERS:

The prices of the agricultural product should be at such level that it may encourage (حوصلہ افزا) the farmers. In Pakistan rural development (دیسی ترقی) programme has been started to improve the economic condition of the rural areas. The government also fixes reasonable (مشغول) prices of wheat, rice cotton and sugar to encourage the farmers every year.

8- CONSOLIDATION OF LAND: (اشتال اراضی)

Small holdings (چھوٹے قطعے) in different areas can not be cultivated (کاشت کرنا) by one owner

(یکجا کرنا) properly. So it is better to consolidate (مالک) all the pieces of land at one place. Keeping in view (مہ نظر رکھنا) this problem the government of Pakistan issued (جاری کرنا) the 1960 Consolidation of Land Act.

9- MARKET FACILITY: (منڈی کی سہولت)

The government should improve the agricultural market (زرعی منڈی). The rural area (دیہی علاقہ) should be linked (منسلک کرنا) with the urban markets (شہری منڈیاں) by the roads. The farmers may be able to get the fair (جائز) return of their product.

Q:3 DISCUSS THE MAJOR FOOD CROPS (غذائی فصلیں) AND CASH CROPS OF PAKISTAN. SUGGEST MEASURES TO IMPROVE THEM. PU.(1973,79,81,85), BZU(1984), IsI. BWP.(1983) PRU(1995).

Ans: Wheat (گندم), rice, maize (مکئی), grams and pulses (دالیں) are included in the food crops. The cash crops are cotton, tobacco (تمباکو) and sugarcane (گنا).

FOOD CROPS (غذائی فصلیں)

1- WHEAT (گندم)

Wheat (گندم) is the major food crop of Pakistan.
