COMMUNICATION SKILLS

BS PROGRAMS

SEMESTER ① ② ③ ④ ⑦

- Precise But Comprehensive
- Functional English
- English Comprehension & Composition
- Communication Skills
- Technical Writing
- Academic Reading & Writing
- English for Employment

Prof. Ch. Tariq Javed

SYLLABUS BS ENGLISH

1ST SEMESTER (ENG-321)

FUNCTIONAL ENGLISH

- Formal/Informal Introduction
- Parts of Speech (Basics of English Grammar)
- Phrases
- Clauses: Subject, Verb, Direct/Indirect Object, Object Complement, Subject Complement
- Sentence Structure
- Kinds of Sentences
- Combining Sentences
- Use of Active/Passive Voice and Direct/Indirect Narration
- English Expressions, Manners & Greetings (Greeting etiquette, Gratitude, Command, Agreement/Disagreement, Time-checking etc)

2ND SEMESTER (ENG-322)

ENGLISH COMPREHENSION AND COMPOSITION

A. READING COMPREHENSION SKILLS

- Identifying main idea/topic sentences
- Find specific information quickly
- Distinguishing between relevant and irrelevant information according to purpose for reading
- Recognizing and interpreting cohesive devices
- Distinguishing between fact and opinion

B. READING TECHNIQUES

- Applying Skimming, Scanning, SQ3R, SPRE

C. VOCABULARY BUILDING SKILLS

- guessing the meanings of unfamiliar words using context clues
- using word formation rules for enhancing vocabulary
- using the dictionary for finding out meanings and use of unfamiliar words

D. PRE-WRITING TECHNIQUES

- Brain Storming 152
- Making a list
- Mind mapping.

E. WRITING TECHNIQUES

- Plan writing: identify audience, purpose and message
- Collect information in various forms such as mind maps, tables, charts, lists
- Order information such as:
 - Chronology for a narrative
 - Stages of a process
 - From general to specific and vice versa
 - From most important to least important
 - Advantages and disadvantages
 - Comparison and contrast
 - Problem solution pattern
 - Write argumentative and descriptive forms of writing using different methods of
 - developing idea like listing, comparison, and contrast, cause and effect, for and against.

F. PARAGRAPH WRITING

- Structure & Development of Paragraph.
- Write and Identify good topic and supporting sentences and effective conclusions.
- Use appropriate cohesive devices such as reference words and signal markers.

G. TYPES OF WRITING

- Narrative Descriptive
- Expository Argumentative

H. ESSAY WRITING TECHNIQUES

- Structure and outline of an essay
- Introductions and conclusions
- Unity and coherence in an essay

I. PARAPHRASING

- What is Paraphrase?
- Paraphrasing Techniques and how to apply

J. PRECIS WRITING

- What is Precis? Uses of precis writing Essentials of a good precis,
- Method of procedure, How to find the title?
- Precis of a Sentence, Precis of a Paragraph, Summarizing an article
- Writing an assignment summary, Expansion of a sentence into paragraph
- Method of expansion

3RD SEMESTER (ENG-421)

COMMUNICATION SKILLS

1. INTRODUCTION TO COMMUNICATION

- Definition, The process of communication, Types of Communication
- Network of Communication, 7C's of Communication, Barriers of Communication
- (noise and classification of noise) How to overcome Barriers?

2. ACTIVE LISTENING

- What is listening? Types of Listening, Objectives of listening, Traits of a good Listener
- Active Listening ____ an Effective Listening Skill, Note Taking Tips
- Barriers for Good Listening, Purpose of Listening, Outlines and Signposting

3. ORAL COMMUNICATION/PRESENTATION SKILLS

- Successful persuasive public speaking, Importance of oral communication
- Effective Presentation strategies,
- Defining the purpose of presentation and analyzing and locale
- Organizing contents and preparing outline, Visual aids
- Nuances of delivery: Kinesics, Proxemics, Paralinguistic, Chronemics

4. INTERVIEWS

- Preparing for interviews (scholarship, job, placement for internship, etc.)
- Types of interviews: Tips for successful Interviews

5. READING SKILLS

- Definition of Reading, Importance of Reading, Levels of Reading
- Requirements of Reading, improving reading rates and comprehension
- Types of reading (intensive and extensive, and speed reading)
- Study skills

6. WRITING SKILLS

- Writing formal letters

- Memos writing, minutes of meetings
- Writing different kinds of applications (leave, job, complaint, etc.)
- Preparing a Cover Letter, Curriculum Vitae (CV) and Resume
- Writing reports: Types of reports, structure of reports
- Progress report writing
- How to write a proposal for research paper/term paper?
- Research paper/term paper (emphasis on style, content, language, form, clarity, consistency)?
- Technical Proposals writing

4TH SEMESTER (ENG-422)

TECHNICAL WRITING

1. TECHNICAL WRITING

- Characteristics of technical writing
- Principles of technical writing style

2. REPORT WRITING

- Types of report
- Structure of progress reports
- Characteristics of report

3. RESEARCH PROPOSAL & RESEARCH PAPER

- Types of proposal
- Characteristics of proposal
- Structure of research proposal

4. RESEARCH PAPER

- Types of research paper
- Elements of research paper

5. PLAGIARISM

- Types of plagiarism
- How to avoid plagiarism

6. CITATION

- Importance of citation

7. ANALYSIS AND SYNTHESIS IN ACADEMIC WRITING

4TH SEMESTER (BS ENGLISH)

ACADEMIC READING & WRITING

- Reading skills
- Reading comprehension
- Study skills
- Writing skills
- Assignment/ term paper writing
- Research paper writing

7TH SEMESTER

ENGLISH FOR EMPLOYMENT

- What is your dream job?
- Job searches _____ International job market
- Reading advertising
- Researching the company and its Ethos
- How to fill out a job application
- writing resumes & cvs _____ overseas job market

TECHNICAL WRITING

Technical writing is a style of communication used to convey information on a specific subject and typically geared toward specialized audiences. This writing style is often associated with relaying information concerning or via technological services, as well as with trained professionals in general. Let us look at some of the features of technical writing that set it apart from other writing styles, along with some special groups of readers of technical material.

- Technical writing is a writing discipline that is sometimes defined as simplifying the complex. It communicates complex information to those who need it to accomplish some task or goal.
- It often results in relevant, useful and accurate information geared to specifically targeted audiences in order to enable a set of actions on the part of the audience in pursuit of a defined goal.

Technical writing is sometimes defined as simplifying the complex. Inherent in such a concise and deceptively simple definition is a whole range of skills and characteristics that address nearly every field of human endeavor at some level. A significant subset of the broader field of technical communication, technical writing involves communicating complex information to those who need it to accomplish some task or goal.

CHARACTERISTICS OF TECHNICAL WRITING

Technical writing, just as any other form of writing, has certain characteristics which distinguish it from other types of writing. It is very different from writing opinion pieces, essays, prose, non-fiction, or fiction. Technical documents are written in a business writing style rather than one that is academic or creative in nature. The purpose of this writing is to present the process, method and ideas in the most understandable way. The content of the language used by the writer should be suitable and understandable for the target audience.

❶ CLARITY — وضاحت

Technical presents information clearly, leaving little to no room for misunderstanding. Every message should be conveyed in a clear and straight forward manner. Clarity depends upon the words you use and the way you use them. First you must have a clear idea in your own mind of what you want to say. Then you must decide how you are going to say it. In general, the writer should use the simplest everyday expressions. After message has been completed, it must be read at least twice and, if necessary, revised.

❷ CONCISENESS — جامعیت، اختصار

The language used in technical writing should be very precise, describing objects and procedures in an exact manner. Conciseness is saying what you have to say in the fewest possible words without sacrificing the other C qualities. A concise message is complete without being wordy. The message should be as brief as possible. A concise message saves time of both the sender and the receiver.

3 CONSIDERATION ————— غاظر مرآت

Consideration means acting on the "Your attitude". It means writing from the point of view of the reader. When we put ourselves in our reader's place, we are considerate. We can understand our reader's desires, problems and emotions. If you can convince the buyer that your goods and services will benefit him, you have done your job.

Three specific ways to indicate consideration are:

- Focus "You" instead of "I" and "we".
- Show audience benefit or interest.
- Emphasize positive, pleasant facts.

4 CONCRETENESS ————— ٹھوس

Communicating concretely means being specific, definite, and vivid rather than vague and general. Moreover, concrete messages are more richly textured than general or vague messages; they tend to be more vivid, active, and interesting. A vague and general message is sure to mislead the reader and cause miscommunication.

5 COMPLETENESS ————— کامائیت

It means that this kind of writing be complete to bring the desired result. We should write everything the receiver needs to know. It helps in avoiding inquiries and further correspondence in the same context. It helps to achieve (پاسل کرنا) positive results. Incomplete messages are never effective.

6 CORRECTNESS ————— درستی

The message being communicated must be correct. Though mistakes are never intentional, they spoil the image of writer. However, a message may be perfect grammatically and mechanically but still insult or lose a customer. It is essential that every letter may carefully be written and revised before it is mailed.

7 VERY STRUCTURED

Technical writing is very structured. This type of writing needs to have an obvious composition that makes it easy for readers to follow along. The audience needs to be able to rely on technical writing for step-by-step instructions.

8 SKIMMABLE

Technical documentation should be designed with skimmability in mind, so it's easy for readers to scan through the full document and easily find information they need. Technical writers should incorporate meaningful, descriptive headings and include a thorough table of contents and/or index.

9 PROBLEM-SOLVING FOCUS

Technical documents should be created with problem solving in mind. Readers use these documents to learn how to perform certain tasks or gain technical information, so they should be easy to follow and organized in a way that's easy to refer back to as questions come up.

PRINCIPLES OF TECHNICAL WRITING STYLE

Well-written and accurate documentation is the part of customer support strategy, and reduces support costs. Technical writing is much more than technical terminology, and curt instructions. Our audience is made up of humans, and not just technical personnel. Technical writing requires that the writer present a main point or thesis, maintain focus, organize and develop ideas, and use the appropriate style for the audience.

● CONTENT

Five basic questions - who, why, what, how and when - are applied in various situations to develop the content for any kind of a document. For instance, imagine a situation where you have to create a report based on your balance sheet. Before creating a report, you can plan the content of your report by applying following key questions to the situation:

- Who would like to read the report?
- Why do you want to/or need to present a report?
- What this report is going to present to the audience?
- How is the report going to be presented?
- When is the report going to be presented?

● AUDIENCE & PURPOSE

Before beginning any writing task, the writer analyzes audience and identifies the purpose for the document. The writer asks following questions about the audience:

- Who will read the document and what are their biases?
- What are technical writer's ethical responsibilities when communicate to audience?

● ORGANIZATION

Writers use an organizational pattern so that it gives consistency to writing. Organizational pattern provide the document with continuity so that audience can comprehend the ideas. The writers can organize their ideas chronologically, spatially and categorically.

● STYLE

Writers change their style depending on the audience. A person would not write an e-mail to a close friend in the same style as a formal memorandum to a manager. Writers adopt either formal or informal styles, depending on the writing situation.

● ACCESSIBILITY AND SPECIFICITY

Accessibility refers to the ease at which the audience can gain the information they need from a document. Table of contents, headers, footers, page numbers, headings and sub headings help make the document more accessible for the intended audiences.

● CONVENTIONAL GRAMMAR

Writers adhere to the rules of conventional grammar and mechanics. Technical writers essentially proofread and edit the document for detecting and correcting errors in graphics, typography and layout.

REPORT WRITING

It is a document which contains the detail of a given problem or situation examined for the purpose of gathering information, suggestions and sometimes making recommendation. There are many varieties of reports, but generally their function is to give an account of something, to answer a question, or to offer a solution to a problem.

Report is communication from someone who has some information for someone who wants to use that information." It can be defined as a communication in which the writer provides information to some individual or organization. The word "report" is derived from the Latin word "reportare" which means "bring back".

NEED OF REPORT

Report writing is a skill of communication. It needs to send comprehensive facts suggestions for higher authority, board, company, organization, department or higher office. In schools we send student performance report to their parents and annual performance reports: result, reports and research reports to higher authorities.

OBJECTIVES OF REPORTS

Reports are primary means of communication in organization. Reports play an important role in small organizations. Reports serve up several functions. These are of great importance. The main purpose of report is to present specific conclusions regarding problem's existence and solution. Here is given below some important purposes of reports.

- To present a record of accomplished work.
- To record an experiment
- To record research findings or technical specification
- To document schedules, timetables, and milestones.
- To present information to a large number of people,
- To present planned information on a particular topic
- To record events for future reference.
- To provide to true facts about an action.

WRITING A REPORT — ITS FORMAT

It has two types:

- ① Short report
- ② Long report Parts

FORMAT OF REPORT

- Cover sheet or letter of transmittal
- Title page
- Acknowledgement
- Abstract
- Table of contents/contents

- Introduction/Abstract/Summary/Overview/ Executive summary
- The body of the report
- Conclusion/recommendations/findings.
- References/Bibliography
- Glossary (if needed)
- Appendices/Annexures.

PARTS OF A REPORT

A formal report is composed of the following parts:

① TITLE PAGE

It bears the subject of the report, the name of the recipient, name of the writer or sender and the date of completion.

② LETTER OF AUTHORIZATION

Letter or Memorandum of Authorization is the letter that authorizes the writer to write the report.

③ LETTER OF TRANSMITTED

Letter of Transmittal comprises the message that conveys the report form the author to the reader. It is usually worded in conversational language.

④ INTRODUCTION / PREFACE

Introduction is an important part of the report. It describes in general the subject and scope of the report.

⑤ TABLE OF CONTENTS

Table of Contents is an important part of a long report. It contains list of the main headings of the report outline with page numbers shown against them.

⑥ TABLE OF CHARTS

Purpose of this Table, like the Table of Contents, is also to guide the reader. It contains list of the charts, maps and other illustrations, included in the report.

⑦ SUMMARY

It is a condensed, concise, accurate statement or what is important in the report. In other words, we may say that summary is a report of the report.

⑧ TEXT

Text or the Body of the Report is the actual report which contains an objective and analytical discussion of the problem.

⑨ APPENDIX

Appendix is the collection of supplementary material, given at the end of the report. This part of the report is used for reference purpose only.

⑩ BIBLIOGRAPHY

It contains a list of the books, magazines, journals, and other such published sources which the author benefitted from to compile the report.

⑪ INDEX

Index is a kind of guide for the reader. It lists alphabetically important words, terms, names, etc. used in the report with their respective page numbers to enable the reader to find them in the document without trouble.

TYPES OF REPORT

These are important types of reports:

- Informational report
- Analytical report
- Periodic and special report
- Business report
- Progress report
- Performance report

① INFORMATIONAL REPORT

An information report is a factual text. It means that it provides information about something in a systematic and coherent manner. An informational report is used to gain a better understanding about a living or non-living subject. An informational report:

- Uses facts to explain something
- Gives details about a topic
- Does not contain personal views
- Is usually written, but can also be presented orally (spoken).
- The first part of an informational report is the title or the heading of the report.
- The first introductory paragraph, known as the classification.

The explanation of the above points is given under.

ITS STRUCTURE

In this report, the various sections are self explanatory and simple. The following information is contained in the body paragraph. This is where the topic of the report is covered in more detail. These paragraphs use factual information to give the reader a better understanding of the topic. Often these paragraphs are broken up into sub headings to help organise the information.

The conclusion of report gives any final details or facts about the topic. It may be also be used to review what the report was about. It has a glossary and bibliography. It has also bibliography. The main purpose of these reports is to give the information in an objective manner and organized manner.

② ANALYTICAL REPORT

This type of report is used to make decisions. It offers both information and analysis. Analytical reports try to understand as a specific genre of reports; analytical reports are a hybrid between an informational report and a proposal. Goals of analytical reports are not only the identification and analysis of a problem not previously tried solutions but also the proposal of evidence-based recommendations to solve that problem where past attempts failed.

IDENTIFYING THE PROBLEM

Analytical reports start by identifying a problem and explaining whom that problem affects. In describing the problem, the report includes information about where the problem started, what methods have been used in the past to solve the problem, and how well those past methods have fared.

PACE COMMUNICATION SKILLS**EXPLAINS METHODS**

After describing both the problem and how past attempts to solve it have fared, an analytical report will then describe the methodology its authors used to evaluate past tactics, as well as consider alternative approaches. For example, an analytical report about the failure of a company's advertising campaign might indicate that information of advertising was gathered through surveys distributed randomly to a sample population.

ANALYZING DATA

As its name suggests, the bulk of an analytical report presents a detailed and careful analysis of data gathered through the research methods employed by the report's authors. Because analytical reports are about problems, their former proposed solutions and potential alternative solutions, the analysis focuses on the success or failures of those solutions to fix the problem.

MAKING RECOMMENDATIONS

This type of report is used to make decisions. It offers both information and analysis and recommendations. These reports build recommending solutions to the problem under examination. It gives solid solutions to solve the problem.

① MEMO SHORT/REPORTS

Usually these types of reports are used inside the organization but depending upon the situation these may be sent outside the firm. The writer of a short report should always try to be simple, direct and to the point.

② FORMAL/LONG REPORTS

A long or formal report is much more detailed than a short report. It covers up a wide range of aspects related to its subject.

Analytical report is further classified into:

③ PERIODIC REPORTS

The reports which are used for keeping records and are made routinely at regular intervals are called periodic reports. These are also called routine reports. These are informational or analytical in their objective. They are prepared and presented at regular, prescribed intervals in the usual routine of business. They may be submitted annually, semi-annually, quarterly, monthly, fortnightly, weekly, or even daily. Generally, such reports contain a mere statement of facts in detail, in summarized form, or in the layouts of prescribed form without an opinion or recommendation. Progress reports of various kind, inspection reports, annual reports, and sales reports all come under this category. These reports can be analytical or interpretative.

④ ORAL & WRITTEN REPORTS:

These are verbal reports. These reports deal with day-to-day matters of lesser importance. An oral report is usually subjective in its approach to the problem. Unlike oral reports written reports are based on written documents. It is completely objective as the writer studies and analyses the problem objectively. Written reports are classified into different

kinds, depending upon their function, format and frequency etc, a broad division of written reports classifies them into:

5 ROUTINE REPORTS

Routine reports deal with the routine matters of a business. These reports do not carry any comments or suggestions. Sales reports, financial reports and production reports are the best examples of these types of reports.

6 BUSINESS REPORT

"A report is a document in which a given problem is examined for conveying information, putting forward ideas and, sometimes making recommendations".

In business report, the various sections are simple. The following information is contained in the body paragraph. This is where the topic of the report is covered in more detail. These paragraphs use factual information to give the reader a better understanding of the topic. The conclusion of report gives any final details or facts about the topic. It may be also be used to review what the report was about. It has a glossary and bibliography. Thus it is presented in a suitable style. It is also important to make a list of any important words to use in glossary.

PROGRESS REPORT

A progress report is a report on work you have begun but not yet completed. This report is one of the series submitted at regular intervals such as every week or months. There are two types of progress report. These are as under:

- Progress in project
- Work on all projects

The basic point of a progress report is to summarize the status and progress for a particular project. In a progress report, you are often expected to commit to an exact schedule for the project completion. You discuss the status of the materials being used and account for the money spent, and summarize concretely both the current findings and the predicted results. The professionalism of the progress report is often vital to the future of the project.

These reports could feel like a mere formality or a waste of time to you, but they are an excellent opportunity to articulate some of the key sentences of your final report and even pose questions in writing to your audience.

STRUCTURE OF PROGRESS REPORTS

Progress Reports give regular update about the progression of a particular ongoing project. It states the expected or set deadlines and then describes the work done till the date of writing the report.

REPORT ELEMENT		READERS QUESTIONS
Introduction	-----	What work does your report cover?
		What is the purpose of the work?

PACE COMMUNICATION SKILLS

Facts and Discussion	Past Work	Is your work progressing as planned or expected? _____ _____
		What Results have you produced? _____ _____
	Future work	What progress do you expect during the next reporting period? _____ _____
	Problems/ Projections	What has gone wrong and when the work will be finished? _____ _____
Conclusions	-----	In long reports ____ How do things stand overall? _____ _____
Recommendations	-----	What do you think we should do? _____ _____

HOW TO WRITE PROGRESS REPORT?

Decide how you want to present your material

Decide how you want to present your material. By the time you start writing your report you'll already have figured out what the tone needs to be and the point of the report. Now you need to decide the best way or ways in which to present that information. You might choose to do a bulleted list. You may also consider adding in graphs or tables. This might be especially good if you're writing a progress report for a project in which you're trying to get funding, or show why you deserve the funding you've been given.

CONSIDER USING SUBSECTIONS

Consider using subsections. To write a successful progress report you want it to be as clear as possible. Splitting your report into subsections is a great way to cluster all relevant material together. Adding subheadings to you can make this even clearer, because it lets your readers or audience know what to expect in each subsection.

WRITE THE HEADING

Write the heading. This typically goes across the top of the paper, if you're using a page format. Again, it will depend on what your company or university prefers, so make sure you check in with them. The heading should include the date, when the report was submitted, the name and the position of the recipient, the writer's name and position, and the subject of the report.

WRITE THE INTRODUCTORY SECTION

Write the introductory section. The introductory section goes below the heading. It can often be set apart from the rest of the material through italics. It gives a brief overview of the project, and summarizes its status. You will be establishing what progress has been made,

and whether certain goals have been achieved.

DO THE BODY OF THE PROPOSAL?

Do the body of the proposal? The body of proposal, whether it is broken into sections and subsections, is basically just a more detailed version of the introduction. Consider the information you've put into the introduction and make sure to expand on that information.

CHARACTERISTICS OF REPORT — رپورٹ کی خصوصیات

① CLARITY

Every information should be conveyed in a clear and straight forward manner. Clarity depends upon the words you use and the way you use them. First you must have a clear idea in your own mind of what you want to say. Then you must decide how you are going to say it. The writer should use the simplest everyday expressions.

② CORRECTNESS

The information being communicated must be correct. Though mistakes are never intentional, they spoil the image of writer. Errors in reports fall in the following categories: Misspelled words and names and mistakes in punctuation, capitalization

③ CONCISENESS

The report should be as brief as possible. A concise report saves time of both the sender and the receiver. Report should not be concise with sacrificing any other principle. Eliminate the wordy expressions and Include only relevant material.

④ COMPREHENSIVE

A report should be comprehensive. It should cover all the aspects of a problem. The writer of a business report should study a problem thoroughly. He should discuss the various causes of a certain problem as well as suggest solution to it.

⑤ OBJECTIVE

A good report is always objective. It means that there should be no personal feelings or prejudices involved in it. The writer should base his report on facts instead of personal opinion.

⑥ COMPLETENESS

Completeness means that report should be complete to bring the desired result. We should write everything the receiver needs to know. It helps to achieve positive results. Incomplete reports are never effective. For completeness, keep the following guideline in mind:

⑦ READABILITY

It must be readable. It is not enough for presentation to be clear; it must be attractive in a form and in terms that capture attention.

① To write a report on opening a cafeteria in a factory

To: The Executive Director,
Honda Motorcycle Manufacturing Factory Limited,
Lahore.

From: Manager (Administration)

Subject: **Opening A Cafeteria In the Factory**

Date: March 11, 2021

INTRODUCTION

This refers to the Office Order No. 200 issued by the Executive Director on October 27, 2020, asking me to find out if opening a Cafeteria in factory premises will be a workable idea.

TEXT WITH CONCLUSION

I interviewed a number of our employees and almost all of them have shown their keenness to have a Cafeteria in the factory area. Because of non-availability of a Cafeteria in the factory area, during the lunch and dinner break, they have to rush out to the different teashops and hotels situated at a distance of about half a mile from the factory. This causes them a great inconvenience, as no conveyance is easily available to them. Moreover, they usually return late after their lunch and dinner intervals. I as such feel that their demand for a Cafeteria on the factory premises is very much justified.

I had talks with the management of some other companies also which are Providing this facility to their employees. They are running their Cafeterias on no-profit-no-loss basis, and are satisfied that in their way they are helping their workers in getting quality-food on cheaper rates.

RECOMMENDATIONS

In view of my findings, I recommend that:

- ① Arrangements to start a Cafeteria within the factory premises may be made as soon as possible. For this purpose, a small building, facilitating the needs of a Cafe, be constructed near the main gate of the factory.
- ② The food-stuff should be made by the factory management, under the supervision of a committee, to be constituted for this purpose.
- ③ Suggestions Register can be maintained to know view of the employees.
- ④ The Cafeteria should be run by the factory management, under the supervision of a committee, to be constituted for this purpose.

Manager (Administration)

② Write a report on decline in business

To: The General Manager (Sales),
Habib Oil Mills Ltd., Sindh Industrial Area,
Karachi.

From: Manager (Sales)

Subject: Report On Decline in Business in Sindh Region.

Date: November 11, 2020

INTRODUCTION

This is submitted to the General Manager (Sales), in accordance with his instructions contained in letter No. 311 of October 20, 2020 vide which I was required to prepare a report on decline in business in Sindh Region.

TEXT WITH CONCLUSION

I visited the Sales Offices of the Mills and almost all the Departmental Stores, situated in the big cities of Sindh, which stock and sell our product. I also had discussions with the Agency Holders, the shopkeepers and members of the public from different walks of life. From the discussions that I had with them, I came to know that till the month of April last, the sales of our product had been quite

satisfactory. It was due to the introduction of a new brand of edible oil in the markets of Sindh Region, by a local, company, that our sales started declining. They not only offered their product in different weights but also kept its price relatively low, to obtain a footing in the market. Another reason of the popularity of the new product is the intense publicity that they carried out through the print and electronic media.

SUGGESTIONS AND RECOMMENDATIONS:

In view of these findings, I recommend that:

- ① Packing of our product be changed to the effect that it is made not only more attractive but is also offered in different weights.
- ② Prices of the product be made competitive by keeping them relatively low as compared with the prices of other edible oils available in the market.
- ③ A strong, effective and result-oriented publicity campaign be launched by acquiring services of commercial artists and professional advertisers
- ④ A prize scheme may be introduced to attract general consumers to the product.

Manager (Sales).

⑤ Write a report on introduction of a new product in market:

To: The Executive Director,
Packages Ltd.,
10, Garden Town,
Lahore.

From: Sales Manager

Subject: Report on Introduction of a New Conditioner in Market

INTRODUCTION

This makes a reference to the instructions contained in your letter No. 132 of June 15, 2020, vide which I was asked to prepare a feasibility report on the proposed venture of introducing a new conditioner in market, I submit the report as under.

Text with findings:

I made a thorough survey of almost all the important cities of the Punjab Province to gather public opinion about the proposed conditioner. I also visited the agency holders of cosmetic products in these cities to ascertain if the market is viable of promoting a new product. During the course of my investigator survey, I felt that the people, in particular the youth, are eager to go for a different product than the fine shampoos available in the market. The fact is that there are mainly two or three brands of conditioners, which are commonly being used by people, and when we shall offer them something really different, it is bound to attract them.

CONCLUSION

In view of the changing trends of people in the use of cosmetic items, there seems to be a good and profitable prospect of business demand of people for a conditioner with a new formula is there. The absence of competition in market also makes it a ripe time for us to introduce our product. The stockist are also ready to distribute and sell our product. The stockist are also ready to distribute and sell our proposed conditioner on acceptable terms and conditions.

RECOMMENDATIONS:

In the light of the above facts, I make the following recommendations:

- ① The company may start the production of the proposed conditioner.
- ② The shape of the bottles and the labeling on them must be made noticeably different from the ones already there in the market.
- ③ The product is offered in different sizes, with a special economy size container.
- ④ Price of the conditioner may be made competitive to attract consumers to it.

Sales Manager

(a) Special format (b) Homogeneity (c) Illustrations (d) accuracy
- _____ reports identifies a problem and explaining whom that problem affects.
(a) Periodic (b) Analytical (c) Informational (d) Routine

Answers	1 -a	2 -c	3 -d	4 -b	5 -a	6 -c	7 -c	8 -a	9 -c	10 -c	11-b
---------	------	------	------	------	------	------	------	------	------	-------	------

EXERCISE NO. 2 Choose the correct answers.

1. Reports which provides information at regular intervals are called _____ report.
(a) Analytical (b) Routine (c) Periodic (d) Informational
2. _____ deals with the methods and principles used in an activity.
(a) Letter (b) Memo (c) Accounts (d) Methodology
3. A _____ report is a report on work you have begun but not yet completed.
(a) Informational (b) Progress (c) periodic (d) Investigative
4. _____ reports deal with the routine matters of a business.
(a) Progress (b) Analytical (c) Periodic (d) Routine
5. _____ reports seek to find answers to predetermined questions.
(a) conference (b) investigative (c) periodic (d) Progress
6. In _____ writing, there is an active effort to understand the reader's needs.
(a) Selfish writing (b) Empathetic (c) Analytical (d) Critical
7. _____ reports are selected to a single occasion or situation.
(a) Oral (b) Written (c) Special (d) Periodic
8. _____ reports deal with non-recurred problems.
(a) Oral (b) Periodic (c) Special (d) progress
9. In _____ report immediate feedback is possible.
(a) Oral (b) Written (c) Special (d) progress
10. _____ reports have more professional value.
(a) Oral (b) Written (c) Special (d) progress
11. A _____ methodology proceeds from the unknown to the known.
(a) Inductive (b) Deductive (c) Periodic (d) Structural

Answers	1 -c	2 -d	3 -b	4 -d	5 -b	6 -b	7 -c	8 -c	9 -a	10 -b	11-b
---------	------	------	------	------	------	------	------	------	------	-------	------

RESEARCH PROPOSAL & RESEARCH PAPER

Proposals are written offers to solve a technical problem or to understand a project of practical or theoretical nature.

A proposal, in simple terms, is an offer by one party to provide a product or service to another party. Proposals are written to people within an organization to an outside company, or to the government. Thus, consultants submit proposal to companies, stating that they can help solve problems with a company; building contractors submit proposals to government that they can build something for the Public Works Department; reputed advertising agencies proffer to publicize a product or an idea for a company; construction companies submit proposals to governments abroad that they can build everything from brigades to skyscrapers- the list is endless.

PURPOSE OF PROPOSAL

Proposal are meant to solve a problem, alter a procedure, find answers to questions, offer advice and training, or conduct research on a topic of interest to both parties. Proposals have different purposes. These are as follows:

- To sell property, such as buildings, machines, airplanes.
- To survey areas for possible water sources.
- To plan and construct airport baggage conveyor systems.
- To modernize the office procedures of a company.
- To train international managers for work in foreign countries.
- To improve engineering performance within a company.
- To conduct the basic research before developing an automobile factory in a foreign country.

Proposals help to review and improve existing products and services to meet the ever increasing and complex requirements of today's highly competitive business environment. They provide new and sound ideas to increase the progress of our society.

IMPORTANCE OF PROPOSALS

- Proposals are valuable records of information in an organization.
- They act as an index of the company's growth or progress.
- Successful proposals given financial returns to the organization.
- They help promote various research activities.
- These activities are very important for the individual, organization, or government.
- Proposals attempt to win contracts for the company undertaking the project.
- Proposal writing develops certain favorable and useful skills.
- It also encourages communicative, persuasive and organizational skills.
- It also improves the powers of estimation, judgment, and discrimination in the writer.

Moreover, the importance of the proposal cannot be denied. Thus, proposals have become a very vital way to get new orders and increase the sales of products.

TYPES OF PROPOSAL

There are two basic types of proposals. These are sales proposal and research proposal. Both these two types may be either solicited or unsolicited.

- Sales proposal
- Research proposal

SALES PROPOSAL

A business proposal is a document that is designed to persuade an organization to buy a product or service. Sales proposals are also known as business proposals. It has three basic objectives.

First, the sale proposal educates and instructs the prospective client about the full nature of his need. Often, prospective client may be aware of only a portion of his need. Second, the proposal convinces the prospect that you have the competence to deliver what he needs, better than he can do himself. Third, the proposal provides justification for the prospect's investment in terms that are useful and understandable to the client.

RESEARCH PROPOSAL

A research proposal is a document proposing a research project, generally in the sciences or academia, and generally constitutes a request for sponsorship of that research. Proposals are evaluated on the cost and potential impact of the proposed research, and on the soundness of the proposed plan for carrying it out.

CHARACTERISTICS OF PROPOSAL

Technical proposals are written offers to solve a technical problem. These proposals are of two kinds. These provide information, reasons and solutions of a problem. The characteristics of these proposals are given under. These are as follows:

- The need for the proposed activity is clearly established, preferably with data.
- The most important ideas are highlighted and repeated in several places.
- Suitable detail is provided in all portions of the proposal.
- It should have the objectives and a detailed schedule of activities for the project schedule.
- The budget and the proposal narrative are consistent.
- These proposals must look attractive and neat.
- These proposals should keep and view the customer's financial gain and his convenience.
- All of the major matters and directions of the proposal are followed carefully.
- It should include summary, background, objectives and description of the problem.
- It should clearly mention methodology and cost estimate.
- The length is consistent with the funding agency's proposal guidelines and expectations.
- The proposal speaks to readers, helping them understand the problems and the project.
- Summarize statements and headings are used to lead the reader.
- The writing style is clear and concise.
- It should have very impressive and easy language.

RESEARCH PROPOSAL

Research proposal is a document proposing a research project, generally in the sciences or academia, and generally constitutes a request for sponsorship of that research. Proposals are evaluated on the cost and potential impact of the proposed research, and on the soundness of the proposed plan for carrying it out.

To summarize, the research proposal should demonstrate that:

- You are engaging in genuine and worthwhile enquiry, that there is a need for the research that it is significant and important, and that it contributes something original to the field you are working in
- You are aware of the breadth and depth of the major schools of thought relevant to your proposed area of work.
- You are able to justify and establish a particular theoretical orientation, and develop a methodological approach
- There is enough funding or available equipment to be able to collect the data
- The topic aligns with your interests and capabilities, and there are supervisors available who are open to working with you
- You can complete the research in the expected time period

Note that the research plan you are submitting is not inflexible, and that it will probably change in focus and perhaps substance as you develop your ideas and progress through the necessary stages of conducting the research.

STRUCTURE OF RESEARCH PROPOSAL

A typical research proposal should contain most or all of the features given below. Which feature will, or should be, included may vary from faculty to faculty, and your supervisor (s) may require you to include or omit some sections (so make sure that check with them).

A COVER PAGE

This is essential. It identifies:

- Your research area via a tentative or proposed title
- Your name, contact details, and qualifications
- The institutional or university name, as well as the specific department
- Supervisor's and co-supervisor's name
- The degree level being attempted

TABLE OF CONTENTS

A table of contents should:

- List the research proposal sections in a hierarchical way, using titles and subtitles
- Give accurate page references for each section

INTRODUCTION

An introduction should:

- Follow a general-to-specific writing pattern
- Start by providing background information that orientates the reader to the research's

general socio-political, historical, scientific, and educational contexts

- Perhaps include a theoretical, personal, or policy-based motivation for the research
- Attempt to persuade, inform or indicate to the reader of the need for the research.
- This is an attempt to convince the reader that the research will be useful, interesting, or significant for the academic community, and may be suggestive of the research 'gap' which from the following literature review

LITERATURE VIEW

The purpose of this is to:

- Demonstrate to your readers that you have read enough to show that you are aware of who the most significant writers or researchers are in your area of research.
- Specify which issues or concepts you will concentrate on in your review (this may well change as you read more widely and deeply)
- Show that you can exercise critical judgment in selecting which issues to focus on and which to ignore
- Show that you can take a critical approach to your area of research
- Argue for the validity of your area of research in terms of its need to address a 'gap' establish the theoretical orientation you are planning to take.

FIVE C's

Five C's of writing a literature review must be kept in mind. These are as follows:

- Cite, so as to keep the primary focus on the literature pertinent to your research problem.
- Compare the various theories, arguments, methodologies and findings.
- Contrast the various themes, arguments, methodologies and approaches.
- Critique the literature which arguments are more persuasive and why?
- Connect the literature to your own area research and investigation.

RESEARCH METHODOLOGY

The purpose of this is to describe your research plans and approach by:

- Indicating the rationale and theoretical source of your choice of research approach
- Describing your rationale for the selection of participants, methods of data collection and analysis, and the steps you will take to ensure that ethical practices are followed
- Suggesting the limits, restrictions or boundaries of your research
- Providing a timetable or research action plan which explains each of the tasks to be carried out and the anticipated times for completion.
- The format of this should be clear and concise.

Keep in mind that a methodology is not just a list of tasks, it is an argument as to why these tasks add up to the best way to investigate the research problem. This is an important point because the mere listing of tasks to be performed does not demonstrate that, collectively, they effectively address the research problem.

PACE COMMUNICATION SKILLS**THESIS STRUCTURE**

This section should provide:

- A description of each proposed chapter via a small paragraph which shows how it links to any previous chapters, and how links to any chapters which may follow
- A proposed table of contents (following the same rules as given above)

SIGNIFICANCE

This section should provide:

- The anticipated outcomes
- A series or paragraphs predicating of the significance of the research

GLOSSARY OF TERMS

- A list of specialized terms, words, or concepts, and their meanings (e.g. foreign borrowings, acronyms, specialized concepts etc.)

APPENDICES

This section should provide:

- Relevant documents which are best not seen in the main proposal text (because they affect readability). These may be source documents, pilot study data, interview questions, surveys questionnaires instruments, etc.

REFERENCES

This section proved:

- A list of the source works that have been found and consulted up to the present
- Use the Harvard UTS referencing conventions

STYLE AND APPEARANCE

The physical appearance of the proposal makes an important non-verbal impression. As proposals are assessed instantly in terms of general appearance, specific, neatness appearance of the table of contents, list of figures, title page, consistency of style, completeness and professionalism.

It is very essential to spend a considerable amount of time in refining these aspects. Each item must be checked and rechecked. It would also help to adopt appropriate means of visual persuasion. Company logos are often found on each page. Colour and visual aids are used to add effectiveness. For example:

A marketing executive's major, unsolicited, successful proposal can have on its cover an accurate sketch of the prospective customer's buildings. The proposal should be attractively bound and protected by a plastic cover.

- It must be attractive in appearance
- The contents must be correct and readable.
- The style of the proposal must be impressive one.
- It must have a blend of different colours.
- The language and words must be understandable.

RESEARCH PAPER

A research paper is an expanded essay that presents your own interpretation or evaluation or arguments. In fact, this guide is designed to help you navigate the research voyage, through developing a research question and thesis, doing the research, writing the paper, and correctly documenting your sources.

TYPES OF RESEARCH PAPER

There are two main types of research papers.

- ① Argumentative research paper
- ② Analytical research paper

ARGUMENTATIVE RESEARCH PAPER

The argumentative research paper consists of an introduction in which the writer clearly introduces the topic and informs his audience exactly which stance often identified as the thesis statement. The purpose of this research paper is persuasion.

ANALYTICAL RESEARCH PAPER

This research paper often begins with the students asking the questions (a. k. a. a research question) on which he has taken no stance. Such a paper is often an exercise in exploration and evolution. For example, perhaps one is interested in old English poem. He has read the poem intently and desires to offer a fresh reading the poem to the academic community.

CHARACTERISTICS

The following characteristics make a research paper well accepted.

- ① Specific not generalized
- ② Measurable
- ③ Attainable
- ④ Realistic
- ⑤ Formatting

SPECIFIC AND GENERALIZED

Research topic is generally based on some problem or a relationship between two variables, this problem should be specifically stated. For example, "The impact of age on purchase decision", in this statement the two variables are clearly defined. There could be further segregation of the variables but it should be stated specifically.

MEASURABLE

There is certain research instruments used in doing some analysis it could be some tool like SPSS or it could be some other physical instrument like thermometer etc, based on the research requirement. The tools could include questionnaires, annual reports etc. the sources for collecting data could be paid like in cases where the sensitive data is involved, here researchers need to buy assignments in relevant to their research report.

PACE COMMUNICATION SKILLS**ATTAINABLE**

The data required for research should be attainable and available. There have been several cases in some educational institutions where the research topic was proposed by the data wasn't attainable when the practical implementation has been done on that. Here students were found to buy essays and other analysis reports to support their write-up.

REALISTIC

The analysis and result must be realistic; it shouldn't be manipulated or maneuvered. The proposed hypothesis for the research would be either accepted or rejected, both are logical.

FORMATTING

There is a certain format that is to be followed in research writing, it could be APA style sheet or MLA etc. there are different criteria defined in different formats like font size, indenting etc.

To conclude, research paper writing is not that difficult if one follows the above mentioned characteristics and the defined format. There are certain helping services available these days that provide custom assistance for assignments, essay, and research reports.

ELEMENTS OF RESEARCH PAPERS

There is no one right style or manner for writing an education paper. Content aside, the writing style and presentation of papers in different educational fields vary greatly. Nevertheless, certain parts are common to most papers, for example:

- Title or cover page
- Abstract
- Introduction of the problem
- Limitations of study
- Methodology
- Literature review
- Main body of paper
- Conclusion

❶ TITLE OR COVER PAGE

The title of a research papers defines a possible word that adequately is the context of the paper. It should be interesting because it attracts the people. So, Title must be chosen with lot of care.

- It should have following characteristics:
- It should be interesting from reader's point of view.
- It should be very impressive to attract the reader
- It should neither be too short nor too long.
- It should contain specific and not general terms

❷ NAMES AND ADDRESS OF THE AUTHORS

- A full name and full address should be considered obligatory.
- Spellings and the name of the authors should remain the same in all his publications.
- If paper is written by different authors, names and addresses should be given separately.

③ ABSTRACT

Not every education paper requires an abstract. However, for longer, more complex papers abstracts are particularly useful. Often only 100 to 300 words, the abstract generally provides a broad overview and is never more than a page. It describes the essence, the main theme of the paper. It includes the research question posed, its significance, the methodology, and the main results or findings. Footnotes or cited works are never listed in an abstract. Remember to take great care in composing the abstract. It's the first part of the paper the instructor reads. It must impress with a strong content, good style. Never write it hastily or carelessly.

There are two types of abstracts.

These are informative abstracts and Indicative abstract. These are as follows:

- ① Informative abstract
- ② Indicative abstract

INFORMATIVE ABSTRACTS

It gives information about the purpose of study, facts, conclusion and arguments.

INDICATIVE ABSTRACTS

It only contains the contents, scope of the work and conclusion. Both types should have the following characteristics.

- It should be concise and possible.
- It should not contain any bibliography or the table of reference.
- It is generally written after the paper is prepared.

④ INTRODUCTION OF THE PROBLEM

A good introduction states the main research problem and thesis argument. What precisely are you studying and why is it important? How original is it? Never provide a lengthy justification for your topic before it has been explicitly stated.

- It should have following characteristics.
- It should be very impressive and understandable
- It should attract the reader
- It should first present the scope of the problem investigated.
- It should state its nature of methodology.

⑤ LIMITATIONS OF STUDY

Indicate as soon as possible what you intend to do, and what you are not going to attempt. You may limit the scope of your paper by any number of factors, for example, time, personnel, gender, age, geographic location, nationality, and so on.

⑥ METHODOLOGY

Discuss your research methodology. Did you employ qualitative or quantitative research methods? Did you administer a questionnaire or interview people? Was any field research conducted? How did you collect data? Did you utilize other libraries or archives? And so on.

Keep in mind that a methodology is not just a list of tasks, it is an argument as to why these tasks add up to the best way to investigate the research problem. This is an important point because the mere listing of tasks to be performed does not demonstrate that, collectively, they effectively address the research problem.

7 LITERATURE REVIEW

The research process uncovers what other writers have written about your topic. Your education paper should include a discussion or review of what is known about the subject how that knowledge was acquired. Once you provide the general and specific context of the existing knowledge, then you yourself can build on other's research. The guide writing a Literature Review will be helpful here.

FIVE C's

Five C's of writing a literature review must be kept in mind. These are as follows:

- Cite, so as to keep the primary focus on the literature pertinent to your research problem.
- Compare the various theories, arguments, methodologies and findings.
- Contrast the various themes, arguments, methodologies and approaches.
- Critique the literature which arguments are more persuasive and why?
- Connect the literature to your own area research and investigation.

8 MAIN BODY OF PAPER

This is generally the longest part of the paper. It is where the author supports the thesis and builds the argument. It contains most of the citations and analysis. This section should focus on a rational development of the thesis with clear reasoning and solid argumentation to all points. A clear focus provides essential unity that characterizes a strong education paper.

9 CONCLUSION

After spending a great deal of time and energy introducing and arguing the points in the main body of the paper, the conclusion brings everything together and underscores what it all means. A stimulating and informative conclusion leaves the reader informed and well-satisfied. A conclusion that makes sense, when read independently from the rest of the paper, will win praise.

10 REFERENCES

This section proved:

- A list of the source works that have been found and consulted up to the present
- Use the Harvard UTS referencing conventions

11 APPENDICES

Education research papers often contain one or more appendices. An appendix contains material that is appropriate for enlarging the reader's understanding, but that does not fit very well into the main body of the paper. Such material might include tables, charts, summaries, questionnaires, interview questions, lengthy statistics, maps, pictures and photographs, lists of terms, glossaries, survey instruments, letters, and copies of historical documents. A paper may have several appendices. They are usually placed after the main body of the paper but before the bibliography or works cited section. They are usually designated by such headings as Appendix A, Appendix B, and so on.

TITLE PAGE RESEARCH PAPER (FORMAT)

FORMAT # 1

RESEARCH PAPER

Checklist for manuscripts

Cover page

- Page header
- Name and Student number
- Course name, number, department & university
- APA format
- Title

Abstract

- Length of contents
- APA format

Body

- Pages numbered top right (all pages, including title page)
- Double-spaced text throughout (all pages)
- APA formatted headings and subheadings
- Begin on separate page
- Page number continuous with paper
- APA formatted references
- All references included from paper

Appendix

- Each separate appendix has title page
- Includes all of the writing process sheets

FORMAT # 2

RESEARCH PAPER

ORGANIZATION

TITLE PAGE

- Title page separate and numbered "Page 1"
- Margins 1 inch all around
- Running head in upper left corner
- Header in upper right corner
- Title: positioned in the upper half of the page, centered, and double-spaced

TABLE OF CONTENTS

(NOTE: Table of Contents is not modeled in APA. Consult instructor for model.)

ABSTRACT (Optional)

- Summary of contents, not to exceed 120 words, on a separate page
- Numbered "Page 2"
- Block format (No initial paragraph indentation)
- Standard margins and spacing

TEXT

- Double-spaced, including quotations. *If quotation is longer than 40 words, indent five spaces from left margin and continue with new margin, double-spacing. This block method does not use quotation marks*
- All pages numbered (including title page) in the upper right corner (1/2 inch from the top of the paper)
- Header on each page just before page number
- One-inch margins on all sides; not right-justified; no hyphens at end of lines
- 12 point standard type (No font variations; no bold or italics; no bullets)
- Endnotes used to add content *but not used for documentation*
- Avoid single line paragraphs or headings at ends of pages

CONTENT ENDNOTES (Optional)

APPENDIXES

- Used for charts, tables, graphs, illustrations, etc.
- Cover sheet needed if more than one appendix
- Separate page for each appendix titled "Appendix A," etc.

REFERENCE CITATION PAGE(S) (See models)

Note: The students should follow the given above formats while preparing their research papers.

EXERCISES

EXERCISE NO. 1 Choose the correct answers.

1. A _____ is an offer by one party to provide a product to another party.
(a) proposal (b) Company (c) presentation (d) studying
2. _____ are written offer to solve a technical problem.
(a) Thesis (b) Novels (c) Proposals (d) Short stories
3. _____ Proposals are also known as business proposals.
(a) Research (b) sales (c) thesis (d) term
4. _____ Proposals are usually academic in nature.
(a) Research (b) Non-solicited (c) Sales (d) multinational
5. A _____ is a concise and coherent summary of your proposed research.
(a) Business proposal (b) Research proposal (c) Sales Proposal (d) Analytical proposal
6. In _____ proposal, the sections for inclusion are frequently specified.
(a) Non-solicited (b) Sales (c) multinational (d) Solicited
7. _____ helps reader to evaluate results of the study.
(a) Material (b) Results (c) Data (d) Introduction
8. _____ of proposals are similar to either short or long reports.
(a) Drafts (b) Title pages (c) Summaries (d) Table of contents
9. A _____ proposal is designed to persuade an organization.
(a) Argumentative (b) Commercial (c) Analytical (d) Business
10. There are _____ main types of research papers.
(a) Two (b) six (c) four (d) three

Answers	1 - a	2- c	3 - b	4 - a	5 - b	6 - d	7 - d	8 - b	9 - d	10 - a
---------	-------	------	-------	-------	-------	-------	-------	-------	-------	--------

EXERCISE NO. 2 Choose the correct answers.

1. In _____ you provide more detail about what others have done in the area.
(a) literature review (b) research question (c) Justification (d) Introduction
2. The _____ can be discussed in conjunction with a research timetable.
(a) literature review (b) research question (c) Research plain (d) Introduction
3. _____ must be provided in the usual scholarly fashion.
(a) research timetable (b) References (c) Outline (d) Picture
4. _____ conveys the message independently.
(a) Numerals (b) Tables (c) data (d) Result
5. In _____ no extra material or new material should be introduced.
(a) Discussion (b) Title (c) Conclusion (d) Reference
6. A _____ proposal is a document proposing a research project.
(a) Scientific (b) Commercial (c) Business (d) Research
7. _____ research paper is often an exercise in exploration and evolution.
(a) Argumentative (b) Analytical (c) Business (d) Commercial
8. The purpose of the _____ research paper is persuasion.
(a) Commercial (b) Sales (c) Analytical (d) Argumentative
9. _____ describes the restrictions over which the proposal has no control.
(a) Purpose (b) Scope (c) Limitations (d) Background
10. _____ defines the boundaries of the projects.
(a) Purpose (b) Background (c) Scope (d) Limitations
11. _____ gives the list of sources which are used or quoted in the proposals.
(a) Budget (b) References (c) Appendices (d) Conclusion

Answers	1 - a	2- c	3 - b	4 - b	5 - c	6 - d	7 - b	8 - d	9 - c	10 - c	11 - d
---------	-------	------	-------	-------	-------	-------	-------	-------	-------	--------	--------

PLAGIARISM

The word plagiarism has come from the Latin word 'plagiarius,' which means to kidnap. It is the act of using someone else's ideas, words, or thoughts as your own without giving credit to the other person. When you give credit to the original author (by giving the person's name, name of the article, and where it was posted or printed), you are citing the source.

Plagiarism is when you do not include this information in your paper. It is a punishable offense, and it is a form of intellectual theft. It is effortless to plagiarize any content or article from the website, but at the same time, it has grave consequences. Plagiarism can affect someone's career adversely. The student often uses parts of an article in his project without crediting the source, therefore, committing plagiarism. The teachers must warn the students about plagiarism.

If the student is changing the word order or summarising the work or using exact lines from a text without using quotation marks or citing the source, that is not crediting the source correctly, then it will be considered plagiarism.

Plagiarism can fail a piece of work trying to serve its primary purpose. While artwork or writing is considered successful if it reaches the audience, plagiarism takes away the credibility of the work, and the artist or writer's message fails to reach the audience. Therefore, the students or artists must not plagiarise, neither deliberately nor accidentally.

TYPES OF PLAGIARISM

There are different types of plagiarism and all are serious violations of academic honesty. We have defined the most common types below and have provided links to examples.

Types of plagiarism are as follow:

- Direct Plagiarism
- Self Plagiarism
- Mosaic Plagiarism
- Accidental Plagiarism

• DIRECT PLAGIARISM

Direct plagiarism is the word-for-word transcription of a section of someone else's work, without attribution and without quotation marks. The deliberate plagiarism of someone else's work is unethical, academically dishonest, and grounds for disciplinary actions, including expulsion.

EXAMPLE:

Word-for-word borrowing from an unacknowledged source, whether intentional or not.

• SELF PLAGIARISM

Self-plagiarism occurs when a student submits his or her own previous work, or mixes parts of previous works, without permission from all professors involved. For example, it would be unacceptable to incorporate part of a term paper you wrote in high school into a paper assigned in a college course. Self-plagiarism also applies to

PACE COMMUNICATION SKILLS

submitting the same piece of work for assignments in different classes without previous permission from both professors.

- **MOSAIC PLAGIARISM**

Mosaic Plagiarism occurs when a student borrows phrases from a source without using quotation marks, or finds synonyms for the author's language while keeping to the same general structure and meaning of the original. Sometimes called "patch writing," this kind of paraphrasing, whether intentional or not, is academically dishonest and punishable - even if you footnote your source!

EXAMPLE

Mosaic plagiarism occurs when a writer reuses a mix of word, phrases, and ideas from a source without indicating which words and ideas have been borrowed and/or without properly citing the source.

- **ACCIDENTAL PLAGIARISM**

Accidental plagiarism occurs when a person neglects to cite their sources, or misquotes their sources, or unintentionally paraphrases a source by using similar words, groups of words, and/or sentence structure without attribution. Students must learn how to cite their sources and to take careful and accurate notes when doing research. Lack of intent does not absolve the student of responsibility for plagiarism. Cases of accidental plagiarism are taken as seriously as any other plagiarism and are subject to the same range of consequences as other types of plagiarism.

HOW TO AVOID PLAGIARISM

Plagiarism is a serious issue and should be avoided at all costs. There are different ways of committing plagiarism, but even if you do so accidentally, you may find yourself in trouble. Be sure to write down the names of people from whom you found information as you write your paper.

The best way to avoid plagiarism is to make sure that you are always:

- Writing your own papers
- Taking notes from sources instead of copying down whole sentences
- Including the sources you are using
- Provide footnotes
- When finding information, be sure you are writing down the name of the author and the book, webpage, or article from which you got it.
- then when you are writing, mention where you got the ideas as you are writing. Even if you aren't quoting word-for-word from the source, you are using the ideas. This must be cited in your paper assignment.

To conclude, plagiarism is a literary theft and an act of forgery and fraud. It is a serious crime of academia and a serious violation of copyright laws. To avoid this academic dishonesty, one should write or reproduce one's writings. They should keep honesty in their writings. It is a serious issue and should be avoided at all costs.

CITATION

Citation is referred as the source quoted in the report, essay, book and other literary work to substantiate the points. If the sources are not cited properly, then it leads to plagiarism. However, citation is a reference that confirms the published as well as unpublished sources. In brief, the citation is the shorten alphanumeric expression enclosed in the body of a literary work, which is mentioned to acknowledge the relevance of the work.

Citation is the tag you put at the end of a piece the information you used is a paraphrase and you put it into your own words, you still must include a citation at the end of the sentence/paragraph. Without it, it is a plagiarism. The purpose of citation is to provide necessary information to the reader to find the source of the given material.

CITATION

The application of citation has important purposes. First of all, it avoids the plagiarism and secondly, it helps the readers to understand the validity as well as the strength of the materials that have been used by the author.

In short, by using citation, the author is informing to his readers about the piece of work that is developed based on the other sources. On the other hand, a citation provides the readers some more information:

- More information about the author
- The title of the literary work
- The date when your copy was published
- The details, including the page numbers of the material which are used as a source.

IMPORTANCE OF CITATION

Including citation in the work is imperative, as it is the right way to show credit to the original author by citing the sources based on that your write up is formed. Thus, your work becomes plagiarism free. In addition to this, there are many reasons to add citations.

- Citation is undoubtedly essential as it guides the readers to know more about your ideas and from where these thoughts came from.
- Your own ideas might be better than the points you got from the others' work and using citation is the right way to present it in front of the readers.
- Citation showcases the effort of the author. In short, it exhibits how much the author tried to accumulate the information.
- Most importantly, citing the sources makes your writing stronger and realistic.
- Citation allows the author to get outside support

Some Situations that need Citation:

- When the author interprets something
- When the quotes are included in the writing
- Whenever the author expresses the ideas which are already shared
- Whenever others' work is used as reference

ANALYSIS AND SYNTHESIS IN ACADEMIC WRITING

The skills of analysis and synthesis play an important role in academic writing. These skills help to establish your ethos with fellow professionals of your area of interest. One must research and understand the conversation about a specific topic before one can attempt to add to it. To understand this conversation he needs to find out credible and latest academic resources on the topic. He needs to analysis these sources individual and then synthesis them to know the trends patterns and limitations etc. Both analysis and synthesis are of great significance in academic writing.

ANALYSIS

It is difficult task to define analysis. It is the investigation of a text's purpose, construction and contents. When you analyse a text, you try to understand what its purpose is. You try to understand why was the text written. Moreover, you need to understand what problem, subject the text discusses. To understand the purpose of the text and construction one need to read a text closely to understand it. For example: when you analyze a substance to find out what it is made of? Thus, in composition, analysis is a form of expository writing in which the writer separates a subject into its parts.

SYNTHESIS

Synthesis means to bring many parts together. When a student reads text book, he uses all the facts and parts to form the main theme/idea or opinion. Putting pieces together to form a new thing, joining your arguments into a logical text of your own is synthesis. Like in chemical synthesis whose task is production of a substance, you produce a written discourse on your subject-from what you know and what you learnt in the given text. It is written discussion that draws on one or more sources. In fact, if you have written research papers, you have already written syntheses. In an academic synthesis, you have inferred among separate sources.

SYNTHESIS & ANALYSIS

Synthesis: the combination of ideas to form a theory, system, larger idea, point or outcome show commonalities or patterns

Analysis: a detailed examination of elements, ideas, or the structure of something can be a basis for discussion or interpretation

Synthesis and Analysis: combine and examine ideas to show how commonalities, patterns, and elements fit together form a unified point for a theory, discussion, or interpretation develop an Informed evaluation of the idea by presenting several different viewpoints and/or ideas

To conclude, while analytical writing is about breaking something apart and looking at the pieces individually, synthesis is about putting ideas and information together to see an overall pattern how things come together.

WHAT IS YOUR DREAM JOB?

"What is your dream job?" This question, unlike many other interview questions, actually has a right answer. But if you respond to "what is your dream job?" with any answer that resembles "this one," then I can guarantee you two things:

- You are not the first person to think you're that clever.
- You will look like a silly little goober.

Instead, you should make an effort to connect your answer to the job you are interviewing for. Just like "where do you see yourself in five years?", the interviewer wants to make sure that the job you are interviewing for matches up with the one you really want — so you need to be sure that you don't imply that it's a temporary pitstop, but instead a checkpoint on the way to your fulfilling life. Learn more about what information interviewers hope to discover through your response, along with some do's and don'ts for answering this question.

WHAT THE INTERVIEWER REALLY WANTS TO KNOW

In the interview, your potential employer will likely focus on figuring out whether or not you have the right skills to be successful in the job. However, they will also be interested in how motivated you are to perform the job, and whether or not you will be satisfied with the position. This interview question helps interviewers assess your motivation. Your response may also offer a glimpse into your values, passions, and priorities as an employee.

WHAT TO MENTION IN YOUR RESPONSE

Ideally, your response to the question should reference some elements of the job at hand. For example, if the position is a customer service job, you might say that your dream job would have a high level of interaction with customers.

You can also focus on the industry in your response to this question: If you are applying for a job at an environmental nonprofit, you can mention your passion for environmentalism. Another option is to frame your answer around your ideal company culture and work environment. For instance, you might say you're eager to work in a collaborative environment or to be a part of a passionate team. Just make sure the environment you mention is a match for the culture in the position's workplace.

In order to prepare your answer, brainstorm what appeals to you about the job:

- Do you enjoy solving problems, or mediating conflicts?
- Do you thrive under pressure?
- Do you consider yourself a "people person" who likes to engage with clients.

Go back to the job listing, and look through the job description and requirements to find what most excites and interests you about the position. In your answer, you can refer both to

skills you currently have and want to use, and ones that you think you'll be able to develop in the position.

CREATE A JOB PROFILE

Think of what you want in a job, and create a "profile" of your ideal job that includes some of those functions. Your "dream job" doesn't have to be a specific position, like "Account Executive" or "Public Relations Director," but can instead include different responsibilities you would enjoy having as part of your position. Your profile can also include skills you enjoy using and the type of company culture you thrive in. Make sure some of those elements match the description of the job for which you are applying.

SHARE EXAMPLES WITH THE INTERVIEWER

Your answer will be more convincing if you reflect on why you found these types of activities rewarding in the past, and how your skill set matches the type of job you're after. Be ready to share some examples of how you have enjoyed utilizing those skills in the past.

FOCUS ON THE PRESENT AND THE FUTURE

Another way to answer the question is to mention a certain goal you would like to reach through your "dream job." For example, if you're applying for a job with a non-profit environmental organization, you might mention that an essential element of your dream career would be a role that advances the green agenda. Ultimately, the key to answering, "Tell me about your dream job?" is to convey your long-term interest in a high-level position, without overshadowing your interest in the job you're applying for.

WHAT NOT TO MENTION IN YOUR RESPONSE

As with any open-ended questions, it's easy to feel like anything goes. But you're still in a job interview, and your responses will be closely examined. Answers that are overly grandiose - "My dream job is CEO," for instance - are off-putting. And if your dream job is to write novels professionally or become a sommelier, that's information best kept to yourself during an interview for a staff accountant position. Here are some other things to avoid in your response:

SPECIFIC JOB TITLES

Keep the focus on the skills aspect of roles, and do not name specific job titles.

AMBITIOUS FUNCTIONS

Tread carefully here. If your dream job involves responsibilities that are far from achievable in the position you're applying for, it could make you seem like you wouldn't be happy for long in the position. Interviewers are more eager to hire applicants who will stick around than ones who will have a short tenure.

JOB SEARCHES — INTERNATIONAL JOB MARKET

Searching for a job is a long process and takes effort. It can take months before you are able to find a job that matches your specific requirements. Patience is the key while you do your job search. However, there are some methods and tips that can really help you to speed up the process of searching and finding a job. No specific job strategy will work for every applicant so be flexible and be persistent. There are many ways to find a job. Some major ways are as follows:

- Newspapers
- Internet
- Job fair

① NEWSPAPERS

A newspaper is a term formed within the boundary of four criteria. The criteria are accessibility, periodicity, universality, and update. It's an accessible source for the majority of the people. It is published on a daily note, which makes it possible to acquire information at a regular interval. It covers various niches, which marks the flexibility of the newspaper. Lastly, it reflects up-to-date stats of the world.

Remember when the classifieds section of the local paper was the obvious place to look for a job? Back at the dawn of the new millennium, the printed "Help Wanted" section was effective recruitment advertising for employers and one of the revenue mainstays of the newspaper industry. But it turned out that what job ads (and the revenue they brought) could lift up, they could also bring crashing down. As employers and job seekers alike migrated to the internet, the performance of printed job ads declined.

Today's online newspaper job ads can be just as effective as an ad in any popular job board and can be discovered in job search engines like Indeed. As for print employment advertising: the fact that some careers advice states that job seekers should start here, because there's less competition, should give you pause for thought — this is not the most promising place for employers. However, there are some niche scenarios where print ads can be useful. To help you decide where to invest your recruitment dollars, we've discussed these below. We've also included details about the reach, cost and logistics for both print and online employment advertising.

ADVANTAGES OF NEWSPAPER ADVERTISING

Newspaper and other forms of print advertising often stay in front of the viewer longer than other advertising options as the reader will remain on the page until they finish reading the article or articles they find interesting. This means that your ad will be looked at longer, as opposed to online ads that people skim over or actively block. Additionally, because people tend to trust their local paper more than they do a random website, consumers often pass that trust on to the advertisers on the page.

Like the internet, newspapers allow you to target a particular group of consumers, although your options may be a little more limited and you won't be able to reach a worldwide audience in most cases. By nature, these publications are geographically targeted, but you can get far more specific if you chose to. For example, if you're hoping to reach local sports fans, you might choose to advertise in the newspaper's sports section. One of the advantages of online newspaper advertising is that you can partner it with print newspaper advertising in many cases.

While newspaper advertising is a little more expensive than online advertising, the good news is that the paper offers many different options based on your budget. You can publish a massive full-page color ad or you can purchase a small listing in the classifieds section. If you can't afford to advertise in a city's main publication, you may be able to find a smaller neighborhood paper with even more affordable rates.

2 INTERNET

In a society where we have become dependent on the internet, many job seekers automatically turn to career search websites or job posting websites. While these online resources are a great way to go about finding an open job in your area, you need to remember that they are not your only option.

The Internet should supplement, not replace, other information sources and job search methods. Use good research and critical evaluation skills as you would with any resource you may use in your job search.

The Internet provides you with many options and tools for a comprehensive job search. You can identify job openings throughout the world, locate and copy files of employer literature, exchange messages with professionals in your field, share ideas and information with specialty user groups, and find advice on résumé writing, interviewing, etc. Employers increasingly use the Internet as a recruiting tool. Many job search services and resources on the Internet are free to job seekers, but some are not.

BENEFITS OF USING THE INTERNET FOR JOB

There are many benefits of using the internet for searching a job:

- Access timely job notices around the clock.
- Locate unusual or difficult-to-find career information.
- Communicate with professionals or resource groups in specialized areas.
- Research companies, organizations and agencies.
- Post your résumé/apply online for positions.

Principle drawbacks of using the Internet include:

- Vast, sometimes unwieldy amounts of career and job search information.
- Privacy issues related to posting your résumé online.
- The disappearance or relocation of useful career sites without notice.

You can generally find career and job search information in one of several ways.

PACE COMMUNICATION SKILLS

- Look up a website address in publications about Internet job searching or in directories of specialty sites on the Internet.
- Use online indexing systems, often referred to as search engines, such as Yahoo or Google, while connected to the Internet.

Ask professionals in your career area if they know of helpful websites.

- Identify webpages which may link to useful sites on a certain topic (such as the Career Center Library Bookmarks located at www.career.fsu.edu/library/links.cfm).

③ JOB FAIR

A job fair is also referred commonly as a career fair or career expo. It is a fair or exposition for employers, recruiters and schools to meet with prospective job seekers. Expos usually include company or organization tables or booths where resumes can be collected and business cards can be exchanged. In the college setting, job fairs are commonly used for entry level job recruiting. Often sponsored by career centers, job fairs provide a convenient location for students to meet employers and perform first interviews. Many companies that attend these job fairs also recruit through the online platforms that the colleges offer. Online job fairs offer the same convenience online. Because of the tough economy at the end of first decade of 2000, an increasing number of senior citizens are attending job fairs to apply for jobs. After having applied online to positions many more senior citizens are also trying their luck with in-person job fairs. Job fairs are good places to meet many company representatives from corporations of all industries and sizes during a short period of time. Every job fair has a set of similar, basic elements or processes that require your attention. Job fair networking can be generally described as the process of interacting with, obtaining contact details of, and getting to know corporate recruiters.

WHAT IS A JOB FAIR LIKE?

Generally, job fair is a event organized by a third party in a common place like a huge auditorium or a ground to hire people for multiple organizations. The concept is job seekers can meet multiple organization at one single place. It is a concept which is a big time saver for both job seekers and the organization. Mostly job fairs are conducted for middle level jobs either for freshers or for minimum two years of experience.

ADVANTAGES OF JOB FAIR

- In any kind of job fair, there is always a good chance of meeting many potential employers at a single place.
- When you apply for a job outside through a career website or through a job board, it takes some time to know the result.
- In case of job fair, as there are too many options on the floor it encourages them to move and search from other options available and not loose confidence.
- Job fair is a very common meet up for job search for the job seekers. There is no room for partiality as well as personal preference for the employers.
- A job fair as there is huge crowd circulating it is a indirect marketing for the organization among the job seekers.

READING ADVERTISING

Advertisements come in many shapes, sizes, and forms. It is a marketing tactic involving paying for space to promote a product, service, or cause. The actual promotional messages are called advertisements, or ads for short. The goal of advertising is to reach people most likely to be willing to pay for a company's products or services and entice them to buy.

TYPES OF ADVERTISING

Advertising activities can be categorized into above the line, below the line, and through the line advertising according to their level of penetration.

- Above the line advertising include activities that are largely non-targeted and have a wide reach. Examples of above the line advertising are TV, radio & newspaper advertisements.
- Below the line advertising include conversion focused activities which are directed towards a specific target group. Examples of below the line advertising are billboards, sponsorships, in-store advertising, etc.
- Through the line advertising include activities which involve the use of both ATL & BTL strategies simultaneously. These are directed towards brand building and conversions and make use of targeted (personalized) advertisement strategies. Examples of through the line advertising are cookie based advertising, digital marketing strategies, etc.

Advertising activities can also be categorized into 5 types based on the advertisement medium used.

These types of advertisements are:

- **Print Advertising:** Newspaper, magazines, & brochure advertisements, etc.
- **Broadcast Advertising:** Television and radio advertisements.
- **Outdoor Advertising:** Hoardings, banners, flags, wraps, etc.
- **Digital Advertising:** Advertisements displayed over the internet and digital devices.
- **Product/Brand Integration:** Product placements in entertainment media like TV show, YouTube video, etc.

CHARACTERISTICS OF ADVERTISING

• PAID FORM

Advertising requires the advertiser (also called sponsor) to pay to create an advertising message, to buy advertising media slot, and to monitor advertising efforts.

• TOOL FOR PROMOTION

Advertising is an element of the promotion mix of an organization.

• ONE WAY COMMUNICATION

Advertising is a one-way communication where brands communicate to the customers through different mediums.

- **PERSONAL OR NON-PERSONAL**

It can be non-personal as in the case of TV, radio, or newspaper advertisements, or highly personal as in the case of social media and other cookie-based advertisements.

OBJECTIVES OF ADVERTISING

There are 3 main objectives of advertising. These are:

- **TO INFORM**

Advertisements are used to increase brand awareness and brand exposure in the target market. Informing potential customers about the brand and its products is the first step towards attaining business goals.

- **TO PERSUADE**

Persuading customers to perform a particular task is a prominent objective of advertising. The tasks may involve buying or trying the products and services offered, to form a brand image, develop a favourable attitude towards the brand etc.

- **TO REMIND**

Another objective of advertising is to reinforce the brand message and to reassure the existing and potential customers about the brand vision. Advertising helps the brand to maintain top of mind awareness and to avoid competitors stealing the customers. This also helps in the word of mouth marketing.

Other objectives of advertising are subsets of these three objectives. These subsets are:

- Brand Building
- Increasing Sales
- Creating Demand
- Engagement
- Expanding Customer Base
- Changing Customers' attitudes, etc.

IMPORTANCE OF ADVERTISING

- **CONVENIENCE**

Targeted informative advertisements make the customer's decision making process easier as they get to know what suits their requirements and budget.

- **AWARENESS**

Advertising educates the customers about different products available in the market and their features. This knowledge helps customers compare different products and choose the best product for them.

- **BETTER QUALITY**

Only brands advertise themselves and their products. There are no advertisements for unbranded products. This ensures better quality to the customers as no brand wants to waste money on false advertising.

HOW TO FILL OUT A JOB APPLICATION

If you are a job seeker, you will probably have to fill out one or more application forms. You should know that employers do read the forms, and that the way you prepare the application can make a big difference in getting an interview and being hired for the job.

BE PREPARED

Make sure you know the correct names, dates, places and other information you will need. It may be helpful to create a sample application to bring with you when you apply for a job, in case you must fill out an application form on the spot.

A BLANK APPLICATION

Filling out the form at home can be easier as you are able to take your time and do a good job. If possible, ask for an extra form, just in case.

READ THE FORM

Before you start writing, look for instructions that say "use pen only" or that tells you to list information in a certain order.

BE NEAT

Use a pen or, if you take the form home, you might want to type the information in. If you need to correct a mistake, use correction fluid.

ANSWERS CORRECTLY

Know proper dates, addresses and how to spell names and places. Don't make up answers.

BE POSITIVE

List what you have been doing, not what you haven't done. For example, if you have been unemployed for a period of time, show the work you have been busy with, such as going to school, managing a household or doing carpentry on your home. If paid experience is not specified, list any volunteer jobs or activities that can show your skill and ability to work.

BE CLEAR

Know the position title you are applying for and the right salary range. You may have to do some research to find this information. The Employment Center can probably help you. Also, most application forms ask when you will be available to start work. Be prepared to answer this question.

ALERT REFERENCES

List people whom you have checked with and who have agreed to give a reference. There are two kinds of references, (1) character or friend (2) employer. Do not use relatives as references.

RE-READ THE APPLICATION

Make sure you correct any errors or omissions. Check your spelling. Then, hand it in or mail it. If you are mailing the form, it is a good idea for you to make a copy for yourself and to note the date you sent the application. Also, when mailing an application, be sure to send a cover letter re-stating your interest and qualifications.

WRITING RESUMES & CVS ——— OVERSEAS JOB MARKET

CURRICULUM VITAE

CV demonstrates (بیان کرتا) your profession and academic achievements, depending on your education, experience and accomplishments (کامیابیاں). A CV can range in length from 2-10 pages or more. Curriculum vitae is a brief account of a person's education, qualification and previous occupations, typically sent with a job application.

This word is frequently seen in conjunction with vitae; a curriculum vitae (Latin for "course of (one's) life") is "a short account of one's career and qualifications prepared typically by an applicant for a position" - in other words, a resume. Curriculum vitae is abbreviated (مختصر کرتا) CV, and is pluralized as curricula vitae.

CV. A summary of a job applicant's professional experience and educational background, along with other relevant information regarding the candidate's qualifications. The curriculum vitae is similar to a resume (خلاصہ), but is used more frequently by candidates who have published works in journals, such as scientists or academic professionals.

IMPORTANCE OF A GOOD CV

Your CV tells potential employers who you are, what you have done in life, and provides them with information about your education and work experience. Your CV is the first chance you get to make a good impression on a potential employer. A top-quality CV will considerably boost your chance of getting a face-to-face interview, so it is worth spending time and effort on the content and presentation. It will make all the difference in obtaining the position you want. You must therefore highlight your skills, expertise and value.

Make sure that you are concise and accurate. Your CV should not, generally, be longer than two pages, so make sure that you tailor it specifically to the job you are applying for and include the skills, qualifications and experience which are most suited to the job. An employer will want to find the following information in your CV.

TYPES OF CURRICULUM VITAE

The format of your CV is just as important as the information you put in it. Formats are also important in capturing the recruiter or hiring manager's attention. There are three main types of CV formats:

① The Chronological CV

Those whose work history is very closely related to the desired job.

② The Functional CV

Those who want to highlight their skills and people who are seeking a career change.

③ The Hybrid (Combination) CV

Those who have mix of relevant skills and similar work experiences.

CHARACTICTICS OF CURRICULUM VITAE

Following are characteristics (اوصاف) of curriculum vitae.

PERSONAL DETAILS

Include your name and address, a phone number, and your email address. You may also

add your nation, address, email address, cell phone

- Date of birth
- Marital ality, gender and date of birth if you wish, but they are not obligatory (لازم).
- Name status and children

EXAMPLE

Name	: Naeem Raza Chaudhary
Date of birth	: 15-09-1983
Marital Status	: Single
Nationality	: Pakistani
CNIC	: 33100-7652103-3
Address	: Ch. house Street No. 2 Umer Garden Faisalabad.
	Tel: Cell: +92 300 663 48 44
Email	: Naeem999@yahoo.com

PERSONAL PROFILE

This is optional, but it can be very effective in summarizing your areas of expertise (مہارت) and characteristics. It is good to include your enthusiasm about working as a Legal Secretary and what motivates you about the industry. Use keywords and keep it brief and concise.

KEY SKILLS

Include any skills you have learnt such as secretarial or IT skills. Explain what you think your personal skills are.

- List relevant software and computer programs that you have mastered.
- And also state your skill level.

EMPLOYMENT HISTORY

Start with your current or last employer and work backwards. List the position or title and the duration of your work in that position or job. You should include the dates of employment, your job title (عنوان) and name of employer, nature of business, responsibilities (ذمہ داریاں), duties and achievements. Try not to leave gaps in your employment history; if you do, it is advisable to account for such times.

Give examples of your work successes and achievements.

- You can also list your work tasks and areas of responsibilities as keywords.
- What your unique skills and experiences are
- Your areas of expertise.

EDUCATION AND QUALIFICATIONS

Write in chronological (تاریخی ترتیب سے) order a brief list of school, college and university qualifications, such as GCSEs, A levels, etc., together with the grades you obtained. Then list any further qualifications you have obtained, together with the names of the awarding bodies. When you include the Legal Secretaries Diploma, make sure that you studied through the institute of Legal Secretaries and Pas. If you are currently studying for a qualification, mention it together with any results achieved so far.

- Begin with your most recent education.
- Your vocation or the name of the faculty/ field in which you studied should be included. The name of the educational institution, when your studies began and when you graduated.
- **STAR technique should be used.** Here star stands for situation, task, action and result.

Situation	What was the situation and when?
Task	What were the objectives and aims?
Action	What was it that you did to achieve these?
Result	What was the end of result? What did you learn?

INTERESTS AND HOBBIES

This is optional but gives you a chance to portray something about your personality. Keep it simple, mention what you do in your free time and note any achievements. Make sure that your interests reflect your personality and who you, if you are interested in film, music or traveling, you should also mention this.

- Leisure activities tell potential employers something about your personality.
- This section should be as short as possible.
- It will help the employer what type of person you are.

REFERENCES

Most employers want references (حواله جات) from previous employers or from other people who know you. A former employer or reference person should be able to confirm the information stated on your CV and on the job application form, or state that you will provide references if needed and upon request.

Reference persons may include previous/ present employers, colleagues, trade union representatives, members of an organization of which you are a member, teachers and people who have trained you. It is essential to select reference persons who are familiar with your work history and who intend to say something positive about you.

The employer usually contacts reference person that you have completed the interview, and inform them about the job or position you are applying for so they are prepared when the potential employer calls.

THE PURPOSE OF CV

A Curriculum Vitae (CV) details all your academic credentials and professional accomplishments and is used for seeking faculty jobs as well as for applying for academic postdoctoral research opportunities, grants and fellowships. The purpose of the CV, is to interest a committee in interviewing you."

It is very important to have a covering letter to support your CV. Moreover, a covering letter should be sent along with Cvs.

The job seeker can adapt this format.

RESUME

A resume is a short document of one or two pages. It is used to give future employers a brief overview of your work history. The term resume is a French word means "To sum up". It provides a summary of your education work history, skill and other accomplishments.

The job seeker should adapt the resume to every position they apply for. It is in the applicant's interest to change the resume from one job application to another and to tailor it to the needs of the specific post. A resume doesn't have to be ordered chronologically, doesn't have to cover your whole career like and is a highly customisable (رنکی ررواچی) document.

- The resume saves employer's time as it is useful in screening the applicants.
- A resume is a brief, targeted list of skills and achievements.
- A resume is a brief summary of your skills and experience over one or two pages.

OBJECTIVES

- State the purpose of a resume.
- Describe the design, length and format of typical and alternative resumes.
- Distinguish (جانتا) between a chronological and a functional resume format.
- Describe the six basic categories of information on a resume.
- Review four sample resumes.
- Write a quality draft of your resume for critique by others.

TYPES OF RESUME FORMAT

The format of your resume is just as important as the information you put in it. Formats are also important in capturing the recruiter or hiring manager's attention. Different resume formats highlight different aspects of your professional skills and accomplishments. Once you get an interview, you can go into more detail about yourself, but your resume should showcase the very best things.

There are three main types of resume formats:

Each resume format has a specific purpose and highlight different parts of the candidate's professional history. These are three main types of resumes formats:

- 1 Chronological
- 2 Functional
- 3 Hybrid (Combination)

CHRONOLOGICAL — تاریخ ترتیب سے

The chronological (تاریخ وار) resume format is the most traditional format. It is also widely preferred by recruiters and hiring managers because it lays out the job seeker's experience in a clear, orderly manner. A chronological resume lists, describes, and dates the details of each job and educational experience separately. Listings under each category are placed in reverse chronological order, starting with the most recent schooling or job.

FUNCTIONAL — فرض سے متعلق

The functional resume format is essentially the exact opposite of the chronological format. This resume format consists of selections from your total experience of only those parts which relate to the job you seek. Under each category, list qualifications, skills, experiences, etc, that logically supports your job objective in functional areas such as management, research, writing, teaching, sales, human relations, etc. Functional resumes are generally not appropriate (مناسب) for traditional college students.

- You should use the functional resume format if you are a new graduate.

HYBRID (COMBINATION) — دوغلا دو سلا

The third type of resume format is called the hybrid or combination format. It is the combination of the chronological and functional resumes. This format highlights skills and accomplishments just as much as it highlights professional experience. The hybrid format takes some of the focus off of employment gaps without hiding them too much. It is a way to showcase your skills while so showcasing your professional achievements.

CONTENTS OF RESUME

Generally a resume contains the following information:

① INTRODUCTION

It includes the name, age, address and telephone number of the applicant. It begins with the name. If you are at a temporary address, you can include this in addition to your permanent address. It has become common practice to include your email address, but make sure it is professional in nature and doesn't contain courtesy words, slang, or profanity. It is also important to choose an email address that you check regularly.

② CAREER OBJECTIVES

It includes career objective of the applicant. Your statement of career objective shows that you have a clear sense of purpose and have given serious thought to your future. Remember to state clearly whether you are looking for an internship, full, or part-time job.

You can focus on any of the following:

- position title
- career area
- organization type
- specific population
- skills you wish to use

③ EDUCATION

Write in chronological order a brief list of school, college and university qualifications, such as GCSEs, A levels, etc., together with the grades you obtained. Then list any further qualifications you have obtained, together with the names of the awarding bodies. If you are currently studying for a qualification, mention it together with any results achieved so far.

- Begin with your most recent education.
- Your vocation and field in which you studied should be included.
- The name of the educational institution, when your studies began and when you graduated.

④ WORK EXPERIENCE

It also contains the work experience. If you have work experience that relates to job, place it before education. You should also provide information about names and addresses of previous employer, duration of your stay, job descriptions, and any extra work done.

- Start with your current or last employer and work backwards.
- List the position or title and the duration of your work in that position or job.
- You should include the dates of employment.
- your job title and name of employer, duties and achievements.

⑤ ACHIEVEMENTS, ACTIVITIES

As employers want balanced employees, that's why they seek applicants who demonstrate responsibility, leadership qualities and an ability to work well with others. Job candidates demonstrate these qualities through personal interests and activities. So you should show the membership of club/societies, hobbies, sports, games and defense services.

⑥ PERSONAL DATA

It also includes (شامل کرتا) personal data like age, date of birth, height, marital status, nationality, domicile etc. Personal information about age, gender, marital status, and ethnicity is typically not included on a resume. In fact, many employers become uncomfortable when receiving this information out of fear they may violate federal equal opportunity laws. It is important to note that this information may be necessary when using a resume to apply for a position abroad. Other information, such as hobbies and interests, should only be included if it is relevant to the position to which you are applying.

⑦ REFERENCES

It also includes the names and addresses of at least two responsible persons, unrelated to the applicant who are agreed to write strong, positive assessments of qualifications and the personal qualities of the applicant. You should avoid members of your family, neighbours and close friend for references.

- List of reference persons by name.
- Mention the firm and organization where you are working.
- You should always provide at least two references.
- Employers are most interested in references (حوالہ) from recent jobs or positions.

SKILLS

Exceptional knowledge of grammar and literature as well as writing styles forms and techniques.

Capable of teaching at higher or lower levels as well as accelerated traditional.

INTERESTS

Making Sketches

Water paintings

Exploring new places

Gardening

Reading and writing articles

EDUCATION

Master of Fine Arts

Selford University,

Manchester

Bachelor of Fine Arts

Michigan State University

A-Level

Cambridge University

O-level

London School of economics,

England

OBJECTIVE

To get a good name in the field of Fine Arts by motivating and encouraging the students and others who have taste in the different fields for Fine Arts.

PROFESSIONAL EXPERIENCE

Assistant Professor of Fine Arts Oakland University

7-1-2015 Present

Auburn Hills, MI

Teach multiple classes each semester including general English courses as well as in-depth literature or writing courses.

Provide a syllabus to students as well as university explaining all assignments and requirements for the semester.

Grade all papers tests quizzes and homework assignments in a timely manner.

Assist in the development of the Fine Arts curriculum for the university.

LANGUAGES

Dutch

English

French

JOB INTERVIEW

A job interview is a one on one interview consisting of a conversation between a job applicant and a representative of an employer which is conducted to assess whether the applicant should be hired. A job interview typically precedes the hiring decision. The interview is usually preceded by the evaluation of submitted resumes from interested candidates, possibly by examining job applications or reading many resumes.

Here the employer wants to learn about the applicant's abilities and experiences.

The candidate wants to learn about the offers and the organization.

Job interviews are usually formal and structured.

Job interview is considered a very useful tools for evaluating potential employees.

The job interview is considered a useful tool for evaluating potential employees.

CHARACTERISTICS OF JOB INTERVIEW

There are some very important characteristics of job or face to face interview. These characteristics are followings:

- **EMPLOYER'S EXPECTATIONS**

Your prospective employer might be looking for the following qualities in you when you appear for an interview:

- **DISPOSITION**

Appearance, clothes, facial expressions, gestures, manners, the way you present yourself, the impression you leave on the employer-all these points are components of your personality. Therefore, you must ensure that you present yourself in a manner that leaves a lasting impression.

- **CAREER OBJECTIVE**

The interview panel will try to gauge what you want to pursue in your life. You may also be asked where you want to see yourself after 10 years. The panel will try to evaluate your current occupation, stated objective, consistency, and reason for change. You should be clear about your career objective and should be able to clearly convey the same to the employer by linking the priorities in your life with your background and aptitude.

- **SUBJECT KNOWLEDGE**

Every employer expects that the prospective employees are well versed with the subject they had pursued in the past or are currently pursuing. Hence the employer will be interested in assessing the subjects of your study, which are related to your job. So you must brush up the fundamentals of your subjects or any specialization you have pursued. Any shift in terms of area or subject also needs to be explained.

• **GENERAL KNOWLEDGE**

A good general awareness is the primary requisite of a candidate aspiring for a job today. The employer tries to assess your curiosity about what's happening all around you, your analytical ability, your mental level, and your potential for coherent perception of multiple happenings. The way you tackle each question is very important. It is necessary to feel confident and develop a positive frame of mind.

• **COMMUNICATION SKILLS**

Communicating effectively is vital for both personal and organizational growth. The employer will try to assess how effective you are in communicating your ideas to him, both verbally and non-verbally, and how intensely you can listen and comprehend.

• **MENTAL AGILITY**

The ability to quickly grasp the question and reply appropriately is a sign of mental alertness. This quality implies quick thinking, presence of mind, and quick response. The interviewer may judge your mental agility by asking an odd question or by making a tricky remark. He could also assess you by the observations you make when he presents you with a practical problem. You can improve this quality by developing the art of concentration.

• **CONSISTENCY**

A good candidate has a positive, definite, and well-developed approach to life. He will stick to his opinion. And make judicious decisions. He will not be moved by emotions and external impressions. The interviewer may ask the same question in a disguised form later in the interview to check your opinion. Never contradict yourself.

• **SELF-CONFIDENCE**

This is the most essential requirement of a good candidate. Self-confidence means trust in yourself. This generates self-esteem and self-respect. By possessing will power, socializing, identifying your shortcomings, fighting fear and nervousness, having a positive approach, and acting as a leader, you can boost your self-confidence. The most interviewers try to find individuals who are able to present themselves well in a face-to-face interview. Here are given some successful and some failure factors of interview.

These factors play an important role in the interview.

• Interpersonal skills • Problem-solving skills • Communication skills • Confidence • Teamwork • Flexibility • Positive attitude towards work • Self-motivation	• Unsuitable personality • Arrogance • Lack of social skills • Uninhibited nervousness • Lack of concentration • Lack of crispness • Lack of firmness • Laziness
--	---

There may be some other successful and failure factors of interview.

TIPS FOR INTERVIEW SUCCESS

Job search techniques are changed, the labour market is changed and job descriptions are changed. But what more or less stays the same is the job interview. It's your chance to sell yourself. The first 30 seconds of a job interview are the most important, so if you want to be a cut above the rest you need to be on the ball. Rob Yeung, a business psychologist, maintains that an interview is all about the three Ps. "You need to prepare, you need to practice, and then, on the day, you need to perform." Here are some tips for interview success.

- **FIRST IMPRESSION COUNTS**

Greet your interviewer with a smile and firm handshake. Give eye contact. Try to make small talk during the walk from the reception area to the interview room. Ch. Fiaz, a human resources manager says, "You have to sell yourself before you can sell anything else and the first 30 seconds are when the interview subconsciously makes decisions about whether they like you or not and whether you will into the team."

- **BE PREPARED**

Reread your CV and the job advert just before the interview. Do your research thoroughly: Look at the company web site or obtain literature. You may be asked about the salary you are looking for so make sure you research that as well.

- **DON'T WAFFLE**

Answer questions properly - even if you need a few moments' silence to collect your thoughts. Anderson advises, "It's better to say you need a minute to think about your answer rather than speak instantly and regret it afterwards."

- **WHY SHOULD THEY HIRE YOU?**

Most job adverts will list qualities they're looking for a team worker, a good communicator so it's up to you to think of examples of how you can demonstrate these skills. Be ready to talk about your knowledge, experience, abilities and skills. Have at least three strong points about yourself that you can relate to the company and job on offer.

- **BE POSITIVE**

Your interviewer will be thinking about what it would be like to work with you, so the last point they'll want to hear is you talking about your boss or current colleagues behind their back. Interviews like to see someone who enjoys a challenge and is enthusiastic.

- **BALANCE BODY LANGUAGE**

It is not what you say, but how you say it. During the interview, do not fold your arms and lean back or look to the floor! Sit upright and try to maintain good eye contact. Use your hands and lean forward when making a point. Many people cannot think and control their body language at the same time, which is why you need to prepare.

- **REMEMBER YOUR MANNERS**

It is better to choose than to be chosen. Tell the interviewer why you are interested in the company and job opportunity. Ask them for a business card and follow it up by sending a "thank-you" email or letter, saying how much you enjoyed meeting them and how interested you are. Take the opportunity to detail the key advantages you bring. By following the three Ps- prepare, practice and perform, you can turn yourself into a candidate who would not look out of place on "The Apprentice."

INTERVIEW TECHNIQUES

- **POSITIVITY**

Be well-mannered with any staff you meet before or after the interview and, if you're feeling particularly nervous, remind yourself that the very worst thing that could happen is you simply not getting the job. During the interview, avoid talking about any personal problems unless completely necessary, and never badmouth your previous employers.

- **BODY LANGUAGE**

Give a firm handshake to your interviewer(s) before and after the session. Once you are seated, sit naturally without slouching in your chair or leaning on the desk. Throughout the interview, remember to smile frequently and retain eye contact.

- **CLARITY**

Answer all questions clearly and concisely, evidencing your most relevant skills, experiences and achievements. It's perfectly acceptable to pause before answering a difficult question to give yourself thinking time, or asking for clarification if, at first, you are unsure what the question means. When answering, don't speak too quickly.

- **ENTHUSIASM**

It is important that you allow your personality to shine throughout, as well as ask thought provoking questions at appropriate moments. Both of these strategies will demonstrate that you're genuinely interested in the role and listening closely to the interviewer.

PRACTICE JOB INTERVIEWS

Most university careers and employability services can help you to practice your interview technique. However, alternative methods of preparation include:

- Treating formal scenarios, such as dissertation discussions with your university tutor, with the same professionalism as you'd treat a genuine interview.
- Scripting and practicing answers to common interview questions with someone you trust, perhaps even recording yourself and reviewing your performance.

ROWBOAT TECHNIQUE

"The Rowboat Technique is simple contraction of abdomen in combination with rhythmic breathing that will allow you to fully overcome your nervousness in any situation. It is applied to overcome nervousness and fear in any interview situation."

Sit forward in a chair, with arms outstretched as if you are grabbing oars in a rowboat.

Take a deep breath.

Slowly pull back your arms and contract the abdomen muscles just below the rib cage.

Keep your muscles tight until all the air has been expelled.

Count to three (don't breathe in yet) and inhale deeply.

Repeat this 2/3 times.

This technique is virtually unnoticeable to anyone nearby. Make it a habit to apply this technique several times before going for an interview. The deep breathing helps to dissipate any chemical that have already been released. It forces body to prepare physically for the upcoming task. The body begins to produce endorphins which will be needed for the anticipated rowing ahead. You can use this technique to overcoming anxiety and tension.

THE INTERVIEW PROCESS

(Material taken) Smallbusiness.chorn.com

Select the right person for your business. There is no perfect answer, but the interview process can be of tremendous help if you use it effectively. Interview candidates for a position within your company is one of the final steps in the hiring process. An interview consists of four distinct steps: These are as following.

- Establishing rapport
- Gathering information
- Closing
- Using body language effectively

● ESTABLISHING RAPPORT

The rapport-establishing step is where the first impressions are formed. Especially in a difficult job market, it is important to ensure that every aspect of the application process is handled as professionally as possible. During the interview process, applicants should work hard to establish a rapport with the interviewer in particular and the company in general. In the interview context, rapport can be thought of as a feeling of mutual engagement and interest between the interviewer and interviewee.

● GATHERING INFORMATION

At this stage, the employer will be asking questions and matching your answer against the critical success factors we have discussed earlier in this chapter. Some may be close-ended while others will be open-ended. Your honesty and sincerity in answering should be evident. Most interviewers are keenly aware of when they are being snowed.

● CLOSING

If your interview was successful, there will usually be an indication of what is to come next. You may be given further company information which is reserved only for the select few. No matter what your view of the interview is up to this point, it is important to personally close interview by establishing continuity of process. Make certain you understand the next step and be prepared to follow up from your side. Always pursue each interview as if it were your last.

● USING BODY LANGUAGE

Various aspects of body language, namely personal appearance, facial expression, posture, gesture, eye contact and persona space - all need to be used effectively during a job interview as they communicate your confidence, sincerity, enthusiasm, interest, seriousness, social skills etc. to the interview panel.

My aim in designing this book is to facilitate the students' understanding of functional English, English comprehension & composition, communication skills, technical writing, academic reading & writing and English for employment. This book has been written in a simple, precise and lucid language. It covers all the contents of the syllabus of different universities for BS programs. I have tried my best in compiling this book by simplifying all the topics with different themes and cogent words to provide a vivid vision for the students.
