

Literal Meaning of Communication:

The word communication is derived from the Latin word 'communis' which means 'common' which indicates common understanding. It is understood as a process of exchange of ideas, news, facts, feelings etc. between people to create common understanding. Most people will relate to

Technological Meaning of Communication:

Most people will relate to the forms of communication—talking or listening. But, communication goes beyond that.

“Communication is transfer of information from the sender to the receiver with the information being understood by the receiver.”

Communication involves the perception of the information as much as the delivery of that information. Effective communication depends on the richness of these ideas.

Importance of Communication:

- Communication allows people to express their thoughts and emotions.
- Effective communication helps in forming and maintaining relationships.

- Communication is important in predicting job success.
- Decisions are made possible effective communication as communication makes the larger participation possible.
- Communication helps in improving the motivation.
- Communication improves the public relations.
- Good communication is essential for resolving conflicts.
- Communication is vital for network.
- It helps individuals to express themselves clearly.

Process of Communication:

There are 8 elements in the process of communication:

- Sender
- Message
- Encoding
- Media / Channel
- Decoding
- Receiver
- Feedback
- Noise

① Sender:

It is the person who conveys his message to other person. The sender may be superior, a peer, a speaker, a writer, an actor, a painter, a subordinate

etc.

② Message:

It contains ideas, feelings, suggestions, order etc., which is to be passed to the receiver from the sender. It is the heart of communication process.

③ Encoding:

It is the process in which the message is to be converted into symbols such as words, pictures, gestures etc.

④ Media / Channel:

It is that path through which the encoded message is transmitted by the sender in the written form, face to face, phone call, internet, a letter, SMS, gesture, sound, e-mail, etc.

⑤ Decoding:

It is the process of converting the encoded symbols of the sender.

⑥ Receiver:

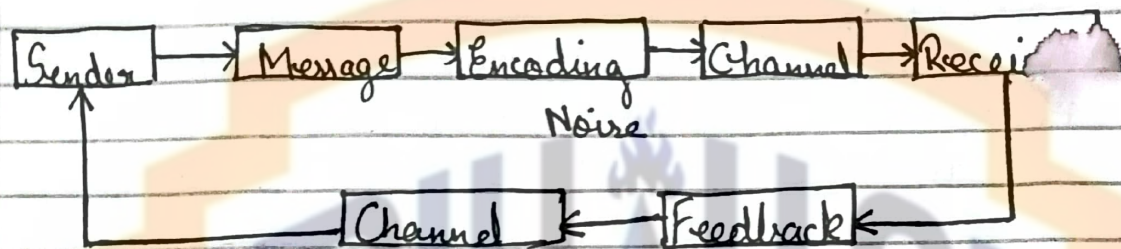

It is the person to whom the message is transmitted. The receiver may be a viewer or a reader.

⑦ Feedback:

Feedback is necessary to ensure that the receiver has received the message and understood it in the same sense as the sender intended. It is a reaction or response.

⑧ Noise:

Any disturbance, hurdle or barrier that can interfere with the interpretation of a message is called noise. It can be persistent or random, and can reduce, obscure, or confuse the clarity of a message.

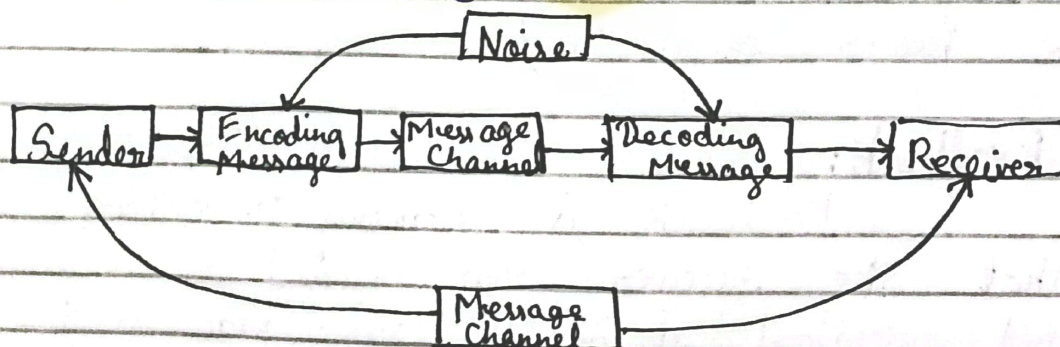

Models of Communication:

- Shannon - Weaver Model
- Berlo Model (S-M-C-R Model)
- Transactional Process Model

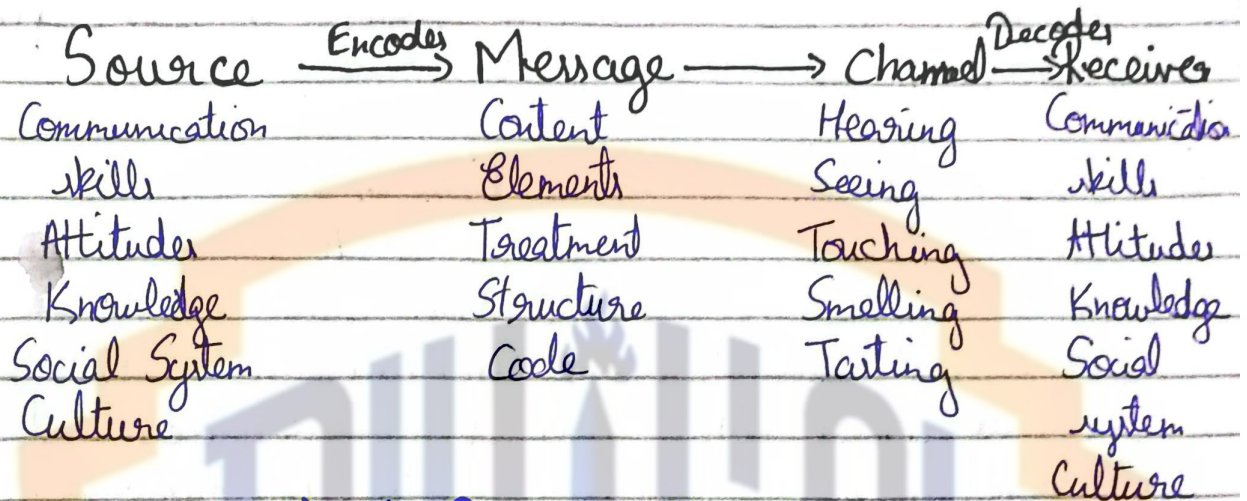

① Shannon - Weaver Model:

This model is especially designed to develop the effective communication between sender and receiver. The model deals with various concepts like information source, transmitter, noise, channel, message, receiver, channel, information destination, encode and decode.

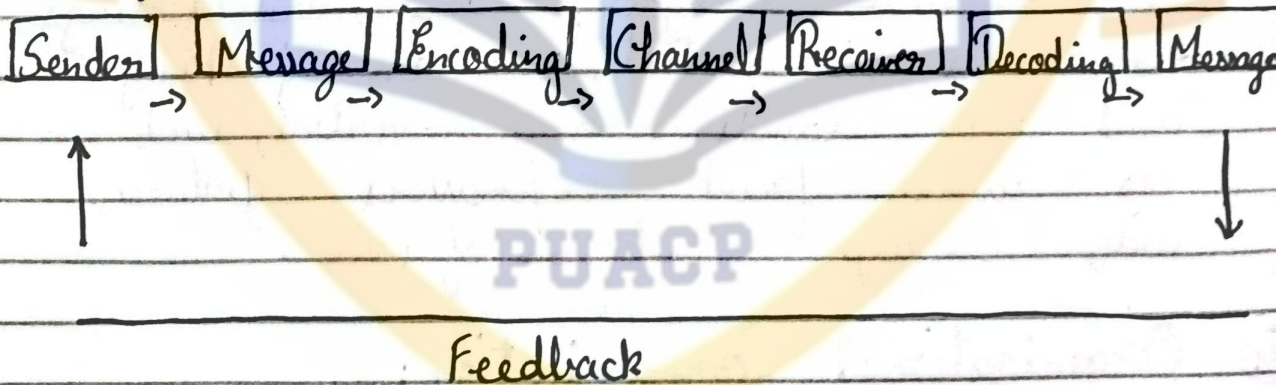

② Berlo Model (S-M-C-R Model):

This model is also known as a dynamic process model.

③ Transactional Process Model:

This model is based on the social approach of organizational behavior.

Levels of Communication:

- Extrapersonal Communication
- Intrapersonal Communication
- Interpersonal Communication
- Organizational Communication
- Mass Communication

① Extrapersonal Communication :

A communication in which human beings interact with other species is called extrapersonal communication. It includes communication with animals, plants, machines or robots, etc.

② Intrapersonal Communication :

A communication in which one communicates with oneself is called intrapersonal communication. It includes self-talk, acts of imagination and visualization, and even recall and memory.

③ Interpersonal Communication :

The exchange of information between people, which can include thoughts, ideas, and feelings. either it is verbal, such as speaking and making sounds, or non-verbal, such as using facial expressions, gestures, body language, and tone of voice.

④ Organizational Communication :

A communication in which individuals in an organization transmit messages through face-to-face, written form, and mediated channels is called organizational communication. It includes team leaders, employees, managers, senior staff etc.

⑤ Mass Communication :

The process of sharing

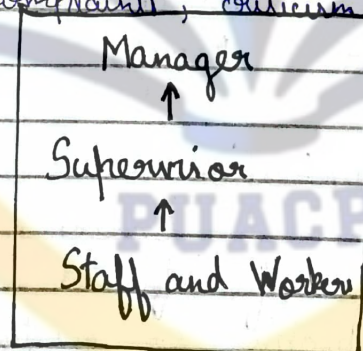

information with a large number of audience through mass media, such as newspapers, television, radios, and social media. It can be accomplished by a person, group, or organization, and can have many purposes including entertainment, educational, and political propaganda.

Flow of Communication:

- Upward
- Downward
- Horizontal
- Vertical
- Diagonal

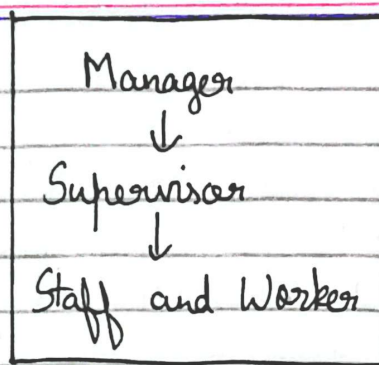

① Upward Communication:

Upward communication is the flow of information from subordinates to superiors, or from employee to management. It includes feedback, suggestions, complaints, criticism, and requests.

② Downward Communication:

Downward communication, also known as top-down communication, is when information flows from higher levels of an organization to lower levels. It includes messages, orders, instructions, and assignments.

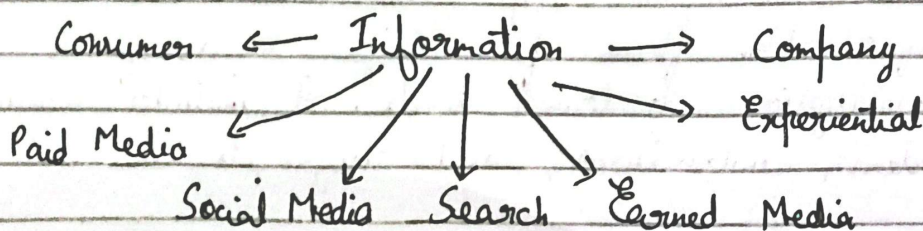

③ Horizontal Communication:

Horizontal communication, also known as lateral communication, is the exchange of information between people, departments, or teams at the same level in an organization. It can include sending a memo to a colleague, emailing your department, or catching up with a teammate over coffee.

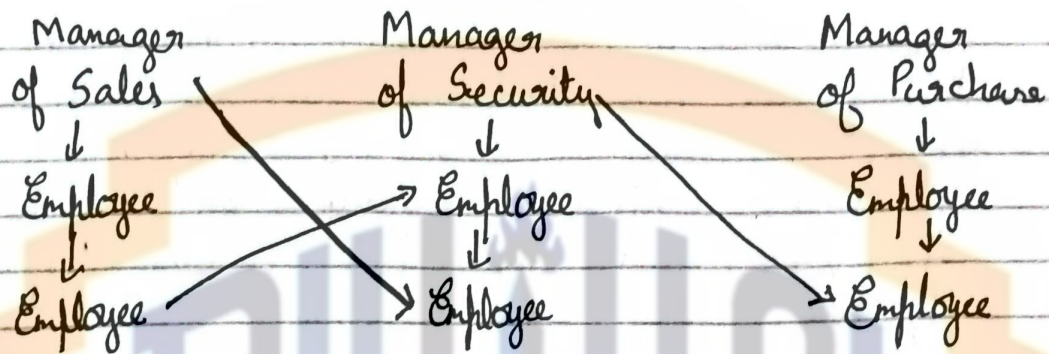

④ External Communication:

External communication is the exchange of information between a company and people or entities outside of the company. It can include customers, clients, stakeholders, media suppliers, investors, shareholders or general public.

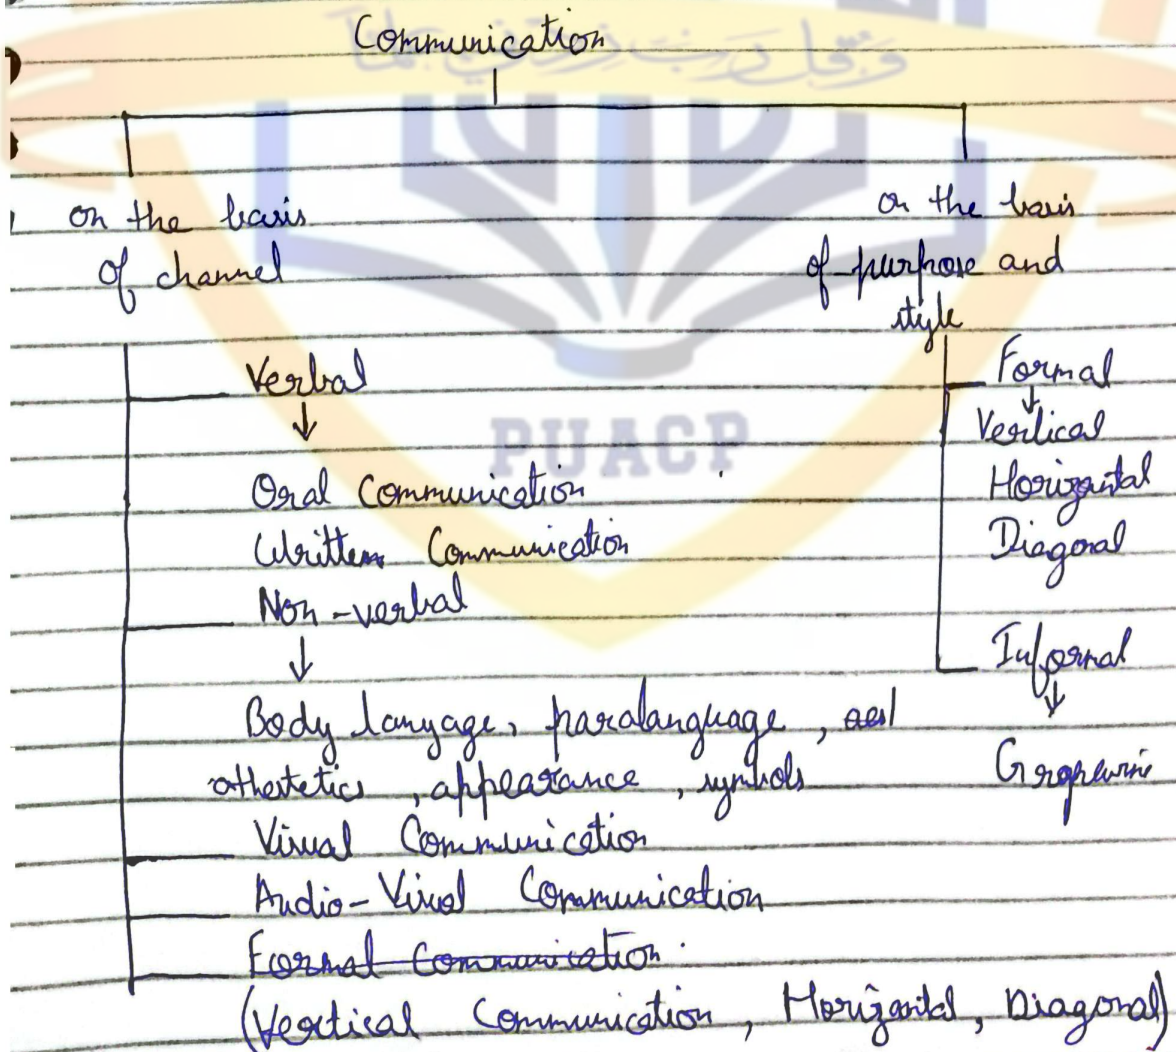

⑤ Diagonal Communication:

Diagonal communication is a communication that allows people from different teams and departments to interact directly, regardless of their position or hierarchical level.

Types of Communication:

① Verbal Communication:

Verbal communication is used to convey the message in words and languages. It is the earliest and latest form of communication.

- Written Communication — It means communication through spoken words. It may be face-to-face such as lecture, seminar, conference, meeting, informal conversation, chit-chat, gossip, or telephone. Clear voice and tone are necessary for effective oral communication.

- Written Communication — Communication via SMS
